Radio receiver set 868 MHz

Part-No.: 73310F2

Comprises:
Radio receiver type 73310J2, with integrated call button, designed with an isolated switch contact output, programmable for call systems with call circuit monitoring or open-circuit current technology. Equipped with easy-to-read LED status indicators for power and for acknowledgement of incoming call alarms. Simple assignment of up to 64 units to the radio receiver, or for compatible radio units a master mode option can be set where the receiver responds independently of assignment (pairing) to all incoming alarms (e.g. in recreation rooms).
Handheld radio transmitter IP68 868 MHz type 73310G2 with red call button in waterproof casing. The handheld transmitter can be used either with an elastic armband and Velcro fastener, or with a lanyard. Power-saving electronics supported by smart battery monitoring that includes transmission of battery status to the radio receiver. Upon call initiation, an optical confirmation indicator is activated for a limited time for the person seeking assistance.

Power supply	3 V battery (handheld transmitter)
Type of protection	IP20 (Receiver), IP68 (Sender)
Dimensions	W: 32 mm H: 53 mm D: 17 mm (handheld transmitter)

Radio receiver, handheld radio transmitter, stretch band and neck strap
