

# Phoenix Controls View Touch Screen

## Monitor and Control

Installed throughout your facility for nurse's stations, local operator displays, and critical space monitoring, the View touch screen is the answer for your monitoring and control needs. The View displays critical data such as space temperature, humidity, occupancy, air changes per hour (ACH), and pressure. PIN protected authentication ensures that only authorized personnel can make changes. The display has a light or dark User Interface (UI) theme and multiple faceplate finish options allow you to customize your View to fit your facility.

## View Touch Screen Features

- Sleek design
- 7" diagonal capacitive touch screen
- Provides read-write access to BACnet® MS/TP variables
- Flush wall mounting
- Three levels of PIN authorization

## Integrate at Room or Suite Level

View information from the BACnet MS/TP capable equipment at either a room or suite level. Used to view data, edit setpoints, and switch control modes through a visually appealing touch screen local operator interface. PIN authentication prevents unauthorized configuration and setpoint changes.

## Truly Flexible Utilization

The View was designed with the customer in mind. The View has a tablet look and feel with capacitive touch screen which helps reduce the learning curve. The View is capable of displaying one or two screens, each with 6 tiles and up to 4 points (for a total of 48 points). Tiles can be configured for notes so the operator can inform others what is going on in the space, add contact information or instructions. Templates in configuration reduce startup time. The View can be linked to any vendors' BACnet MS/TP devices making it the premium local interface for your entire facility.

## User Friendly Interface

### Easy to use large setpoint adjusters.

Reduce errors when making setpoint changes. Use arrows to index up and down or tap the number and manually enter value via keypad.

### Alternate light UI theme for greater diversity.

Allows user the flexibility to select a color scheme that better complements its surroundings.

Offset	ACH	Occupancy
<b>-100 cfm</b> -110 cfm	<b>10.0</b>	<b>Occupied</b> Occupied
Temperature	Supply Flow	Note
<b>72.5°F</b> 73.0°F	<b>200 cfm</b> 200 cfm	Please contact Dr. Jones before entering room. Patient is Contagious.

### Vivid full screen alarm coupled with audible tone.

Never worry about an alarm going unnoticed. Full screen flashing visual alarms and adjustable volume audible alarms ensure that alarm states are noticed.
