# Pro-Watch® Your Choice

For more than two decades, Honeywell's Pro-Watch® security management suite has been chosen by Fortune 100 and Fortune 1000 companies worldwide to protect people, property and assets by combining visitor management, access control, IP video surveillance and intrusion into one powerful system. And now, Pro-Watch 3.81 offers an

## Open Platform

Pro-Watch 3.81 offers an open platform that drives effortless integration with disparate and third-party systems – resulting in cost savings and increased operational efficiencies.

- Drives energy savings through a more efficient use of HVAC and building management systems, enabling real return on investment.
- Gives you the freedom to create custom-fit solutions using easy to use tools like the Pro-Watch Integration Kit—saving you time and money.
- Integrates seamlessly to visitor management, mass notification and other systems for tighter security.

## Affordable Scalability

Organisations are seeking more economical ways to expand their existing access control systems—one door at a time. And now Honeywell is making that a reality. Pro-Watch 3.81 offers an affordable single door option.

- Easily expand an existing Pro-Watch system by adding one door at a time using the PW6101 single door controller.
- PW6101 is Power over Ethernet (PoE) for hassle-free integration into a larger system because it connects to an existing network's wiring.
- Ideal for remote locations, gated communities, or smaller facilities with fewer doors that need remote door capabilities without the need for larger control panels.

# for Security.

**open platform** to enable seamless integration for building management systems—as well as any third party system. It gives you **affordable scalability** to add access control one door at a time, and offers **virtualisation** to adapt your operations for any environment. It's a simple choice. Choose Pro-Watch and make Honeywell your partner in security.

## Virtualisation

The need to reduce space and conserve energy without jeopardising a facility's uptime is necessary to operate at optimal performance. That's why Pro-Watch 3.81 now supports virtual environments.

- Eliminate server management expenses and IT costs, and reduce total cost of ownership.
- IT can operate Pro-Watch using VMware and Microsoft Hyper-V—improving productivity and uptime.
- Excellent opportunity for organisations looking to go virtual and utilise the cost savings for investment in other areas.

## Pro-Watch 3.81 Features

**Single Door PoE Controller + Reader Module** – affordable expansion of access control that is managed locally, globally or both.

**Pro-Watch Integration Kit** – software development tool that enables centralised monitoring and management of security, secondary fire, lighting, HVAC and other building management functions, resulting in cost savings.

**Virtualisation** – supports VMware and Microsoft Hyper-V, which reduces server management expenses and system interruptions.

**Software-based License Keys** – eliminates the need for USB dongles.

**S-NET Protocol Compatibility** – support for S-NET readers and wiring to PW-6000 panel lets you leverage existing wiring and readers, providing a cost-effective migration path from legacy Star I controllers.

**Open Supervised Device Protocol LCD Readers** – The triggers and procedures of Pro-Watch send ASCII text strings to OSDP devices that have LCD displays.

To learn more about the new features and functionality of Pro-Watch 3.81, download the datasheet at [www.honeywellintegrated.eu](http://www.honeywellintegrated.eu).

We support open standards and architecture through our Honeywell Open Technology Alliance (HOTA). HOTA enables open exchange of technology between security and IT manufacturers—maximising an end user's investment in existing security technology. Honeywell is also a contributing member of ONVIF and PSIA.

## Award-Winning Security Management

Honeywell's Pro-Watch® security management suite was selected by top resellers in the USA in 2011 as a Best Channel Product by *Business Solutions Magazine*.

### Which Edition Best Fits Your Needs?

#### **Pro-Watch Enterprise**

Global control with local autonomy for large multinational applications with unlimited users and doors.

#### **Pro-Watch Corporate**

For mid-size to large applications, from 5 users and 96 doors or more.

#### **Pro-Watch Professional**

For small to mid-size applications, up to 5 users and 64 doors.

#### **Pro-Watch Lite**

Basic functionality for the small business with up to 32 doors. Badging not included.

## Choose Pro-Watch Today!

The sooner you act, the sooner you can streamline your security operations with Honeywell's solutions.
