## New System Sensor L-Series 4-Wire Indoor Notification Appliances

System Sensor is excited to announce the next phase of our L-Series product line with the availability of 4-wire indoor horn strobes. This new L-Series offering includes second generation enhancements like a new rigid mounting plate and metal screw insert.

4-wire horn strobe appliances enable independently controlled horns and strobes, if supported by the fire alarm control panel, for designs with separate horn and strobe circuits. One common application is providing temporal 3 with a synchronized strobe for a fire alarm and temporal 4 for a CO alarm. Another application is providing different coding options for pre- and final notification of a releasing agent.

These new 4-wire devices provide a consistent look with the previously released L-Series product line while offering the following enhancements over the previous SpectrAlert® Advance line:

- 38% lower current draw for ceiling appliances and 35% less for wall appliances which enables more appliances per NAC to **save money on power supplies**
- Colored lenses and marking bezels for **easy customization** of emergency communication/mass notification
- **Backwards compatibility** with existing System Sensor SpectrAlert and SpectrAlert Advance notification appliances for retrofit applications

New part numbers for the L-Series 4-wire indoor line of notification appliances include:

NEW L-SERIES MODEL NO.	LEGACY MODEL NO.	DESCRIPTION
P4RL	P4R, P4RH	Horn Strobe, Wall, 4-Wire, Red
P4WL	P4W	Horn Strobe, Wall, 4-Wire, White
PC4RL	PC4R, PC4RH	Horn Strobe, Ceiling, 4-Wire, Red
PC4WL	PC4W	Horn Strobe, Ceiling, 4-Wire, White
