

A77-AB Adapter Bracket

The System Sensor A77-AB Adapter Bracket allows installers to retrofit applications where a larger diameter smoke detector was previously installed.

This Adapter Bracket covers unsightly footprints allowing a new System Sensor direct-wire detector to blend into the acoustical tile without the need for costly ceiling repainting. This simple solution reduces installed costs on fire alarm system retrofits.

Features

- 6.5" diameter to cover retrofit applications using System Sensor 100, and 400 series direct-wire detectors
- Bracket color blends with 100 and 400 series detectors
- Made of high UV-resistant plastic
- No additional hardware needed

Installation of Adapter Bracket

Figure 1. Install adapter bracket between ceiling and mounting bracket.
