

### Key Features

- Video verification of remote alarm events.
- Monitor multiple remote sites across a network.
- Expandable from a single to multiple operator control room.
- Fast display, storage and retrieval of alarm images.
- Carry out virtual guard tours of remote sites.
- Listen or talk to a remote site.
- Individual user access control.
- Control devices such as lights, gates or barriers at remote sites.
- Remotely control PTZ cameras for monitoring or surveillance.
- Control sites from a User Interface or Interactive Maps.
- Database search to recall and display all previous events.
- Automatic operator notification of the absence of site communications.
- Easy to use icons, pull-down menus and wizards for control and administration.
- Remote setup of on-site equipment.
- Database storage of site information with backups and immediate retrieval options.
- Integrated reporting.
- ADPRO VideoWall module provides outstanding surveillance capability.
- Direct link to ADPRO VideoCentral Gold search.
- ADPRO VideoCentral Platinum utilises Industry Standard Microsoft SQL database which provides standard management and expansion capabilities.
- ADPRO VideoCentral Platinum Lite version for the installer - commissioning tool for single installation, including alarm handling and reporting.
- Ability to save live video and audio with operator activity provides management with an audit trail.
- Joystick support for PTZ cameras.
- Site overview of all unarmed/disarmed ADPRO and HeiTel remote video transmission and recording platforms.
- Fast connection speed on low bandwidth.
- Quick comment buttons (See Fig. 1).
- Available in multiple languages.
- Pre-recorded audio sequences (See Fig. 2).

### Description

ADPRO VideoCentral Platinum (VCP) is a multi-site video security management software application specifically designed to monitor video and audio from remote sites fitted with ADPRO NVR+ platforms and HeiTel VideoGateways.

The VCP software is a single version product that will support multiple PCs and operators. It is ideal for either Central Monitoring Station (CMS) and command centre applications or for a single operator or laptop user who requires only periodic viewing or monitoring of a site.

### Video Alarm Verification

ADPRO VideoCentral Platinum is widely used for video alarm and event verification of remote site alarms. Alarms cause the ADPRO and HeiTel remote video transmitters and recorders to connect to ADPRO VideoCentral Platinum and send video images of the alarm events. High priority events such as panic, duress or armed holdup can be viewed in real-time.

Site owners can use VCP on a PC or laptop to remotely view video or assess an appropriate response, eliminating needless visits by site owners or security patrols.

### Interactive Monitoring

Typical applications include remote monitoring of staff, stock and general site activity. Interactive, user definable maps enable an operator to call and control sites directly from a map or site layout.

### ADPRO VideoWall Surveillance Module

The ADPRO VideoWall module provides video surveillance capability across all ADPRO and HeiTel transmitters including ADPRO FastTrace, FastTx, FastVu, FastScan, FastTrace 2, FastTrace 2E, iFT NVR+ Series and HeiTel VideoGateways. Integration between ADPRO VideoCentral Platinum and ADPRO VideoWall delivers seamless operation.

### Audio

Integrated listening ability assists the alarm verification process, while transmission of the operator's voice or pre-recorded audio messages to the site provides instant intruder control.

### Video Hard Disk Recording and Printing

Alarm video is automatically saved to the hard disk for later recall and image printing.

### Mobile Aid Application for First Responders (iRespond)

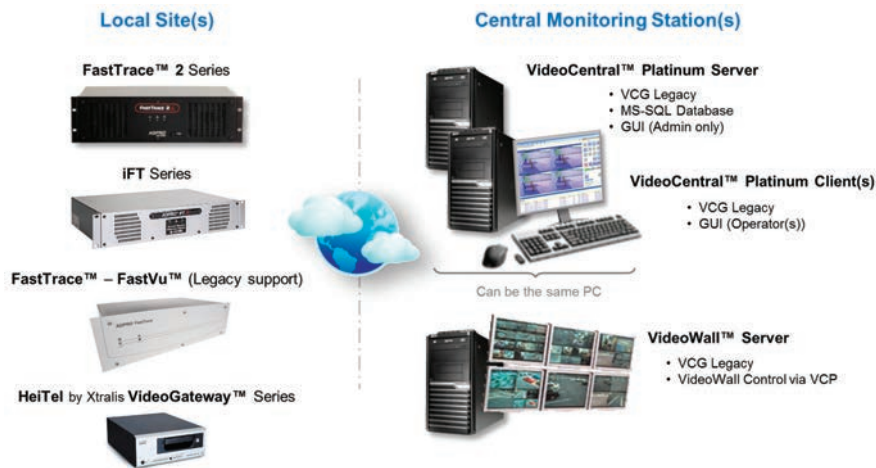

Download the iRespond\* mobile application to provide situational awareness (video/site information) via an Apple iPhone or iPad for first responders such as police, fire brigades, and emergency teams. iRespond prevents unnecessary intervention, reduces damage and risk to human life while providing remote command and control for building owners and users from anywhere.

\* iRespond requires an XO-enabled ADPRO or HeiTel video transmission and recording system used in conjunction with VCP 3.x.

### System Configuration

### Specifications

<b>PC requirement (minimum)</b>	QuadCore / 2,6 GHz / 8 GB RAM (16 GB recommended) / HDD* 1TB (7200 rpm) / Ethernet 1000 Mbps connection Multi PC config – Server/DB
<b>PC requirement (Single user/client)</b>	QuadCore / 2,6 GHz / 4 GB RAM (8 GB recommended) / HDD* 320 GB (7200 rpm) / Ethernet connection 100 Mbps
<b>Video card/monitor</b>	512 MB / 1280*1024 resolution optional dual display (for interactive maps)
<b>PC requirement (Video Wall configuration)</b>	i5/i7 Processor / 4GB RAM / HDD* 320 GB (7200 rpm) / Ethernet connection 1000 Mbps (Backbone)
<b>DVD-ROM</b>	Minimum 10 speed
<b>Mouse/Keyboard</b>	Windows compatible
<b>Sound card (speaker/ microphone)</b>	Required if audio capability is to be used
<b>Operating system (Recommended)</b>	Windows 7 Professional 64 bit – 32 bit Windows Server 2008/R2 64 bit – 32 bit***
<b>Operating system (Supported)</b>	Windows Server 2003 / 32 bit SP2
<b>Supported Products**</b>	ADPRO FastTrace 2 Series / iFT Series / HeiTel VideoGateways

\* The HDD configuration needs to be in accordance with the CMS activity. Please refer to the VCP Technical Manual (document no. 19115) for further detailed information.

\*\* For connection to legacy products (ADPRO FastTrace, ADPRO FastVu and ADPRO FastScan), please refer to the specifications in the ADPRO VideoCentral Gold datasheet.

\*\*\* Use Windows Server 2008 32-bit if legacy support is required (VideoCentral Gold).

### Ordering Information

VCPSW-1- USB VideoCentral Platinum (USB dongle)	202447
VCPSW-1 SK VideoCentral Platinum (Software License key)	202449
