

Connected Building Platform

Pro-Watch® 4.3.5

Honeywell's Pro-Watch® software is a connected building platform for enterprise and critical infrastructure customers. It helps you meet the most stringent compliance requirements for your industry, and it reduces your total cost of ownership by increasing operator productivity with superior flexibility and scalability.

Integration with access control and video systems from Honeywell and third-party manufacturers makes it possible to leverage existing installed hardware as the system expands. Modular hardware and software options make it easy and cost-effective to expand a system to keep up with growing business needs.

With Pro-Watch Web Based Client, customers can utilize their existing network infrastructure to provide remote security management for badging, reporting, and alarm and event monitoring. Less software allows for savings on installation costs and time while continuing to provide optimal security protection.

Pro-Watch streamlines tasks with a common user interface to improve operator effectiveness and help organizations minimize training costs. Events may be routed to specific workstations and linked to automated system responses such as camera call-ups and outward notifications.

Pro-Watch provides comprehensive options for audit and reporting to address forensics, compliance and business intelligence data mining needs. The Reporting application includes basic report templates and the capability to generate custom reports. Reports can be exported as XLS, CSV and PDF formats.

Pro-Watch provides a solid and proven platform for an intelligent business management solution. It is successfully deployed in enterprises of many sizes and across various vertical applications such as manufacturing facilities, campuses, government facilities and critical infrastructure.

FFATURES

- Web Based Client for Badging, Reporting, Alarm and Event Monitoring
- Mobile Client for Badging, Badging Verification, and Door
- Server support including Windows* Server 2012/2012R2, SQL Server 2012/2014/2016, Windows 7/8/8.1/10 (32-bit and 64-bit)
- Single user interface for multiple security and business functions
- Honeywell Software
 Development Kit (HSDK)
 and Pro-Watch can be
 integrated with other
 building systems
 such as secondary
 fire, lighting and
 heating, ventilation,
 and air conditioning
- Web Services API enables Integration Options

- Certification
 Management
- Custom triggers and procedures
- Event/action associations including sending emails, running a stored procedure, or triggering a panel I/O
- Pro-Watch-level triggered events for panel-to-panel and panel-to-software actions or within a panel for local actions
- Advanced Reports
- Virtualization support for VMWare and Microsoft[®] Hyper-V
- Compliance Reports that offer data and statistical reporting; auto generated reports upon schedules

- Easy system setup and maintenance with user definable hardware templates
- Database partitioning and definable operator permissions
- IP, serial and modem communications
- Mercury M5 (CASI) and MS Bridge (Software House) Controller
- Lite, Professional, Corporate and Enterprise editions

The Pro-Watch suite offers hase software licenses that address security needs from small sites to global enterprises:

Pro-Watch Lite Edition:

Basic functionality for the small office with support for up to 32 doors on PW-Series panels.

Pro-Watch Professional

Edition: Complete security functionality with more options for medium-sized organizations with up to 64 doors for organizations requiring integrated processes or regulatory compliance.

Pro-Watch Corporate

Edition: Complete security for larger organizations and campuses. Additional high availability options make this edition the optimal choice for organizations requiring 24/7 business continuity plans for their security system.

Pro-Watch Enterprise

Edition: Global security system that merges multiple Pro-Watch Corporate Edition systems to efficiently manage badgeholder data and report on events across the organization.

Small Systems:

Pro-Watch Lite and Pro-Watch Professional Editions

Pro-Watch Lite Edition (PWLT) and Pro-Watch Professional Edition (PWPE) are optimized for the needs of smaller security systems.

These editions leverage Microsoft® SQL Express 2016 (included), so the server can be accommodated on either a workstation for a single PC or on a separate server. In either case, additional clients may be connected to the server up to supported limits. Refer to the specifications guide on page 5 for more details.

Pro-Watch Lite Edition offers basic functionality for the small office and features Pro-Watch PW Series access controllers. Additional client licenses can be added as needed up to a total of 4.

Pro-Watch Professional Edition is ideal for sites requiring more than 32 readers or up to 6 client workstations.

Medium & Large Systems:

Pro-Watch Professional and Pro-Watch Corporate Editions

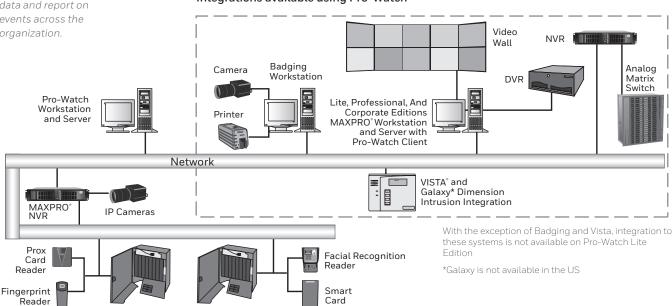

Both Pro-Watch Professional Edition (PWPE) and Pro-Watch Corporate Edition (PWCE) are targeted for the needs of medium to large installations.

An IT topology deployment with a separate server is recommended. Workstations can be connected via LAN or WAN, making it convenient to manage multiple sites on a single server. Pro-Watch Professional Edition features Microsoft SQL Express 2016 (included).

Both editions offer numerous options to meet a variety of security needs. For limits on connectivity support in PWPE, refer to the specifications guide on page 5.

PWCE is truly the best fit for the largest systems and campuses because it has no restrictions on numbers of add-on readers or workstations. Honeywell also offers redundant solutions on PWCE for organizations requiring 24/7 operations.

Integrations available using Pro-Watch

Reader

PW-6000

Enterprise Systems: Pro-Watch Enterprise Edition

Pro-Watch Enterprise Edition (PWEE) provides a security solution for the global organization by sharing badgeholder identities and event data across the organization.

With a PWEE system, an enterprise server facilitates two-way data sharing among regional servers. This enables single credential solutions across organizations.

If equipped with two or more Pro-Watch Corporate Editions (PWCE), an organization may easily upgrade its servers to become part of an Enterprise system. Each Corporate Edition server becomes a regional server and retains regional system control.

PROFESSIONAL, CORPORATE & ENTERPRISE EDITIONS

- Standard Badging and Advanced Badging client
- Available IOS/ Android Mobile Client with support for Badging functions and Door Control
- 2-D PDF417 barcode add-on license for badging
- Option for Transportation Security Clearinghouse (TSC) background checks in Pro-Watch AP (Airport) and Vendor management Portal
- Integration to Honeywell VISTA* panels 128 /250 FBP, FBPT, BPE, and BPT, and GX in North America and to Honeywell Galaxy Dimension GD-48, GD-96, GD-264, GD-520 in Europe
- Event Procedures triggers on consecutive duplicate events
- Mustering, antipassback and guard tour
- Minimum and maximum occupancy enforcement
- Integrates video devices added in MAXPRO® VMS
- Supports Commend intercom system servers GE200, GE300, GE700 and GE800
- Detailed historic records for tracking configuration changes, security operations and device events to comply with audit requirements for regulatory compliance
- Intercoms linked to readers and locations on maps provide quick access to specific units
- Options for integrating biometrics, third-party hardware, radar-video solutions and IT convergence

- High availability and redundant server solutions (Corporate Edition)
- Support for Wireless Locksets from Allegion, Assa Abloy, and Salto
- Supportfor
 Disconnected Locksets
 from Salto
- FICAM PACS Infrastructure APL Listed

PRO-WATCH CLIENT WORKSTATION REQUIREMENTS

FEATURE	REQUIREMENT	
Recommended Processor	Intel® Core™ i3, i5, or i7 Processor 2.8 GHz or higher.	
Recommended Operating System	Windows® 8/8.1 (32 or 64 bit) Windows 10 Windows 2012/2012/2014 Server Enterprise or Standard edition (32 or 64 bit)	
Recommended PC Type	Workstation or Server hardware	
Recommended System Memory (RAM) ¹	4 GB for Windows 7/8/8.1 (32 and 64 bit) 4 GB for Windows 10	
DVD Drive	Yes	
Hard Drives	Capacity, Speed, Interface: 80 GB or larger 7,200 RPM SATA or SAS	
USB connection	2.0	
Network connection	100Mbits/sec or greater, GB recommended	
Video resolution	1024x768 pixels; 24 bit color or higher	
Multimodia	Standard VGA Graphice Adapter (Dieplay adapter)	

¹ Includes RAM required by the client machine to run the Windows operating system.

² Must order one regional server in an Enterprise system for each PWCE server in the system.

³ Enterprise system capabilities align with Corporate for respective regional servers.

Enterprise systems link together two or more Corporate Edition systems to share badgeholder identities and events among the Corporate Edition systems.

PRO-WATCH SERVER¹ REQUIREMENTS

FEATURE	SMALL SYSTEM REQUIREMENT	LARGER SYSTEM REQUIREMENT

Recommended System Memory (RAM)	8 GB minimum, 16 GB recommended or greater (based on OS selected)	16 GB minimum, 32-64 GB recommended (Windows Server 2008 R2 Standard Edition 32 bit only supports up to 4 GB)
DVD Drive	Yes	Yes
Hard Drives ^{2,3}	Capacity, Speed, Interface: 160 GB 7,200RPM or higher SATA or SAS *Size may vary according to transaction storage and other variables such as archives, backups, etc.	RAID Array 1: (OS or hardware based RAID 1) Capacity, Speed, Interface: 160 GB 7,200RPM or higher SATA or SAS RAID Array 2: (Application Databases) (Hardware based RAID 5 or RAID 10) Capacity, Speed, Interface: 300 GB 7,200RPM or higher SATA or SAS *Size may vary according to transaction storage and other variables such as archives, backups, etc.
Removable media for database backup ⁴ database backup ⁴	160 GB or larger USB or eSATA drive	300 GB or larger USB drive or eSATA drive
USB connection	2.0 or greater (Pro-Watch Dongle requires 2.0, not required for Pro-Watch 3.81 or greater with SoftKey License)	2.0 or greater (Pro-Watch Dongle requires 2.0, not required for Pro-Watch 3.81 or greater with SoftKey License)
Network connection	100Mbits/sec or greater, GB recommended	100Mbits/sec or greater, GB recommended
Video resolution	1024x768 pixels; 24 bit color or higher	1024x768 pixels; 24 bit color or higher
	Standard VGA Graphics Adapter (Display adapter)	Standard VGA Graphics Adapter (Display adapter)

- 1 For a system to be considered small, the Pro-Watch system shall have less than 5 clients, no more than 128 online readers, less than 5000 historical events per day, and proper database maintenance conducted by the end user or servicing dealer. For a system to be large, it must have between 5000 and 50,000 historical events per day, between 128 and 512 online readers, between 5 and 15 client workstations, and proper database maintenance conducted by the end user or servicing dealer. If the system will have more than 50,000 events per day, exceed 512 online readers, exceed 15 client workstations, or use Pro-Watch server side functions like anti-passback, event triggers and procedures, Real Time Data Transfer Utility, HSDK, etc. please consult Honeywell for custom server sizing.
- 2 RAID technology used for the larger system server Disk sets 1 and 2. When several physical disks are set up to use RAID technology, the operating system will be installed on a single disk (OS installed on RAID1 mirrored set) and the Database and Storage on a separate disk (RAID 5 or 10 disk set)
- 3 To estimate database storage space, use the following approximations and add to the base DB size of 500MB:
 - $\bullet \ \, \text{Badgeholder storage = (\# \ of \ badgeholders)} \ x \ (75\text{KB})^{\star} \ estimate \ based \ on \ typical \ captured \ picture \ size$
 - Event history storage = (# of events per day) x (2.5 KB) x (# of days to retain in server)
 - Audit history storage = [(# of cardholder changes per day) + (# of system configuration changes per day)+(# of events per day)+(# of operator system changes per day)]* (1.2KB) x (# of days to retain in server)
- 4 Honeywell highly recommends some type of removable media for daily database backups. Database backups should be removed from the server and stored in a safe, secure location so in the event of system failure this valuable data can be recovered. We recommend two or more removable media per server based upon end user processes.

 Alternatively, Honeywell system installers can engage the end-user's IT group to participate in some type of network backup program.
 - Important Notice These server and workstation hardware guidelines are intended for use as a reference only. The specifications are subject to changes due to market conditions, software updates, manufacturing changes, and other variables outside of our control. Honeywell recommends for planning based on system growth and expansion, operating system updates and upgrades, database engine updates and upgrades, end user system expansion, historical data retention requirements, and archive data storage requirements. Please consult with Honeywell as applicable for assistance.
