

CIPer MODEL 10 CONTROLLER

PRODUCT DATA

GENERAL

Honeywell CIPer Model 10 is an IP-based field equipment controller powered by the Niagara Framework®. CIPer Model 10 controllers drive applications such as zone temperature control, and the operation of fan coil units, single-stage air handling units, water-source heat pumps and more. CIPer Model 10 controllers run the full Niagara stack, with 10 points of on-board IO and IO-R-34 expansion capability. CIPer Model 10 licensing supports three devices and 50 total points.

FEATURES

- CIPer Model 10 controllers can be daisy chained to continue network connectivity and eliminate the need for separate wiring back to a switch
- Connect CIPer Model 10 controllers to your main building or IT network and manage them directly with a Supervisor alongside of a WEB-800X
- Use the secondary Ethernet port of the WEB-800X to create a private network of CIPer Model 10 controllers

SPECIFICATIONS

Niagara4—Requires WEBs-N4.7 or later

HARDWARE

NXP iMX6 SoloX2: 800 MHz ARM Cortex-A9/M4

512 MB DDR SDRAM

2GB total eMMC flash storage with user space set at 1GB

Powered from 24VAC/DC source

5 Universal inputs: Type 3 (10K) thermistors, 0-100K ohm, 0-10VDC, 0-20mA with external resistor, Dry Contact

2 Analog outputs: 0-10VDC, 4mA max output current

3 Digital outputs: Triac, 24VAC @.5 amp

2 10/100MB Ethernet ports capable of daisy chaining

1 RS-485 serial port

Real-time clock

Secure boot
