

RCM-SS

Six-Relay Addressable Control Module

Description

Gamewell's SmartScan™ **RCM-SS six-relay control module** provides an intelligent alarm system with six Form-C relays.

The first module is addressed from 01 to 94 while the remaining modules are automatically assigned to the next five higher addresses. Provisions are included for disabling a maximum of three unused modules. A single isolated set of dry relay contacts is provided for each module address, which is capable of being wired for either a normally-open or normally-closed operation. The module allows the control panel to switch these contacts on command. No supervision is provided for the controlled circuit.

Each RCM-SS module has panel-controlled green LED indicators. The panel can cause the LEDs to blink, latch on, or latch off.
