## Wireless TVOC Sensor

---

### Introduction

R720E is a wireless communication device that detects temperature, humidity and TVOC.

TVOC refers to all organic gaseous substances in a space, and generally refers to the indoor volatile organic substances. TVOC is also the much serious one of the three types of pollution affecting indoor air quality. R720E can detect the concentration value of TVOC, and transmit the detected data to other devices through the wireless network for display. It adopts SX1276 wireless communication module.

### Main Characteristic

- Apply SX1276 wireless communication module
- 2 ER14505 lithium batteries (3.6V / section) in parallel
- TVOC concentration detection
- Temperature and humidity detection
- Compatible with LoRaWAN™ Class A
- Frequency hopping spread spectrum
- Configuration parameters can be configured via a third-party software platform, data can be read and alerts can be set via SMS text and email (optional)
- Applicable to the third-party platforms: Actility/ThingPark, TTN, MyDevices/Cayenne
- Low power consumption and long battery life

Note: Battery life is determined by the sensor reporting frequency and other variables.
