## VAV CONTROLLER

Honeywell's Spyder™ Model 7 VAV controller is a programmable room controller with integrated actuator and air flow sensor.

As a freely programmable VAV controller with universal inputs and outputs, Spyder™ Model 7 has configuration flexibility to achieve a variety of specific applications. Smart engineering and commissioning tools with Niagara WEBs-N4 workbench and a mobile application for test and balance make installation cost-effective.

Spyder™ Model 7 offers BACnet IP or BACnet MSTP, Sylk™ bus technology, Modbus RTU RS-485, flexible universal input / output (UIO) points and solid-state relays.
