GFP-BB-RA

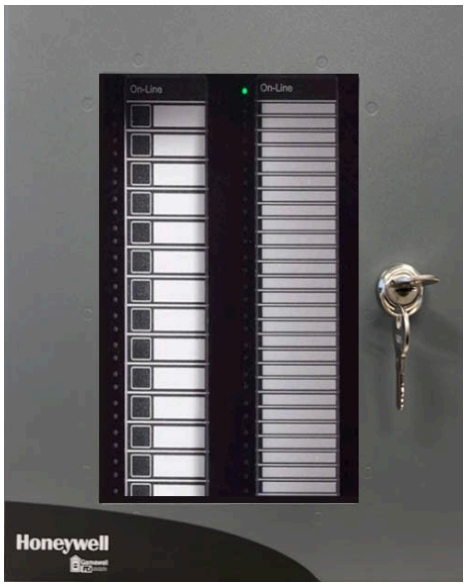

Cabinets with Locking Doors for ACM-30

GFP-BB-RA enclosures provide a dedicated, surface-mount housing for the ACM-30 annunciator, supporting both new installations and straightforward retrofits using existing system backboxes.

The GFP-BB-RA is a surface-mount enclosure designed for the ACM-30 annunciator.

For new installations, the GFP-BB-RA is used as a complete enclosure assembly containing the backbox, dress plate, and locking front door. The ACM-30 mounts directly to the supplied dress plate using factory-installed PEM studs for fast, tool-efficient installation.

For retrofit installations, the GFP-BB-RA enables a clean upgrade path from legacy ASM-16 annunciators housed in the E3BB-BAA1 backboxes. The existing backbox remains in place while the installer replaces the old dress plate and cover with the new GFP-BB-RA components, creating a seamless transition to the ACM-30 with minimal disruption.

GFP-BB-RA for ACM-30

FEATURES AND BENEFITS

- **Retrofit-ready design** – Enables straightforward replacement of legacy ASM-16 annunciators using existing E3BB-BAA1 backboxes, minimizing wall repair and system downtime.
- **Pre-installed grounding hardware** – Ground wire connection aligns with the top PEM stud for secure attachment and compliance with electrical installation standards.

ORDERING INFORMATION

The GFP-BB-RA is supplied as one complete SKU, suitable for both new installations and retrofit applications.

- New installations use the full enclosure assembly, including the supplied backbox.
- Retrofit installations reuse the existing E3BB-BAA1 backbox.

Only the new front door and dress plate from the GFP-BB-RA package are installed; unused components may be discarded.

AGENCY LISTINGS AND APPROVALS

The file number(s) below reference the specific listings for the modules in this document. In some cases, certain modules or applications may not be listed by certain approval agencies, or listing may be in process. Consult Gamewell-FCI for latest listing status.

- **UL Listed:** S635
- **FM Approved**
- **CSFM:** In Progress
- **FDNY:** In Progress

STANDARDS AND CODES

The GFP-BB-RA Series complies with the following UL Standards and must be installed per applicable NFPA 72, International Building Code (IBC) and California Building Code (CBC):

- **UL 864,** 10th edition (Control Units and Accessories for Fire Alarm Systems).
- **UL 2017** (General-Purpose Signaling Devices and Systems)
- Should be installed as per **NFPA 72** National Fire Protection Association
