Access Control and Visitor Management

Key Features

- Single-Step provisioning in the cove app that links to a user's OnGuard access profile
- Automatically updates mobile access credentials when access levels change in cove
- Seamless real-time visitor syncing between cove and OnGuard
- Visitor self-check-in with mobile QR codes or barcodes along with lobby kiosks

cove is an integrated platform that consolidates tenant experience, operations, and key performance data into one system. We are trusted by the best to power the future of real estate. With cove, the mobile app becomes the key to the building. We offer tight integrations with access control systems for timed amenity access and digital visitor passes.

Effortless Mobile Access

Unlock a new level of convenience with mobile credentials. Users from our partner sites can effortlessly provision mobile access through the cove app using their registered email address in OnGuard. With just a couple of taps, their mobile device becomes their key to access HID readers where they have permissions. Having an issue? No problem. Users can easily reset and provision a new credential, ensuring they always have secure, convenient access in their pocket.

Customizable Visitor Management

Property managers can now configure visitor arrival settings to perfectly match their property's unique needs. From visitor email settings and arrival messages to self-service features and badge printing options, our system offers unparalleled customization. Enhance your visitor processing with a system tailored to your specific requirements.
