Phoenix G2 ATX

Station Alerting Controller

The ATX Station Controller stores the station configuration and alerting locations in memory. It can easily be configured and updated remotely through our encrypted Web interface, over a private network. The ATX computer features a secure, embedded operating system that runs on a high-speed SSD memory. It also has a touchscreen display for first responders to view station alerts.

Features

- Touchscreen display shows system status and last dispatch (and more)
- Zoned Alerting
- Voice Alert – announces dispatches without dispatcher intervention (optional)
- Four channel x 20 watt, 70 volt audio amplifier connects to existing speakers
- Heart-saver alert tone precedes all alerts
- Three Audio Inputs – Dispatch Radio, Telephone Intercom, and Auxiliary
- Eight POE (power over Ethernet) Connections for use with optional Phoenix G2 peripherals
- Support for four zones of Phoenix G2 LED Illuminated Speakers
- Support for rip-and-run network and serial printers
- Wall mount, desktop, and 19" rack install (ATX-E ordered separately)
- Simple installation – connect power, radio, Ethernet, speakers
- Remote or local configuration via web browser
- Four Form “C” relay outputs and three configurable dry inputs (e.g. door bell)
- Control one MS-G series message sign, and add more as needed with Phoenix G2 Message Remotes

Technical Specifications

- Power: 750 W
- Voltage: 47-63Hz/90-132 VAC/180-264 VAC (Selectable Switch)
- 1 Year Parts & Labor Warranty
- Service Contract Available
- Black, powder-coated steel enclosure
- Dimensions: 17.25" x 17.50" x 6.06" (WxHxL)
