

# GET THE WHOLE PICTURE

Complete Video Solutions for Your Business

Do More Than Security

Today's digital technology provides significantly higher-quality images, helping to identify suspects with more accuracy using up to 4K quality cameras.

Protect yourself against liabilities. With video evidence of an alleged incident such as a slip and fall, claims can be investigated quickly and verified appropriately.

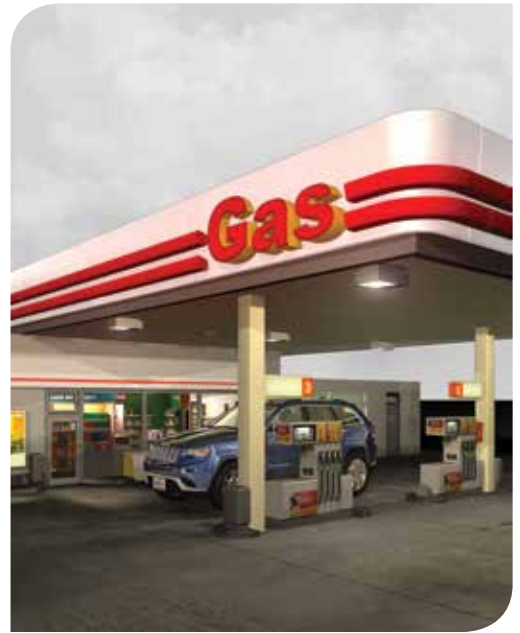

Video lets you proactively observe potential high theft zones. Our video solutions provide tamper-proof, encrypted and watermarked clips that can be copied securely and saved for however long you need.

Outside cameras get clear facial details of individuals and capture license plates to apprehend and prosecute "drive-offs."

- Minimize litigation and limit your liability with video recordings
- Generate greater revenue by identifying customer buying behaviors and traffic patterns, letting you place higher value merchandise where you have the biggest traffic flow
- Enable quick detection and response through I-View Now, which alerts central station personnel the instant alarms are sounded
- Create searchable events by using support for other devices like motion sensors, glassbreak detectors and more
- Remotely access recorded video events and receive clear images through the alert notifications on your mobile device, making it easy to notify emergency response personnel and prevent false alarms
- Enjoy superior protection 24/7 with video solutions that work hard for your business all day, every day

### **Performance Series High Quality Analog (HQA)**

Get the most from your current system with our Performance Series High Quality Analog cameras and recording devices. HQA uses your existing analog cable and provides you with a high definition picture. Available in 4, 8, and 16 channel DVRs and hybrid recorders that support 1080p up to 4K indoor, outdoor IR Ball, Bullet, and Mini Dome cameras. HQA is also backed by our 365 Swap for easy, no-hassle returns or exchanges.

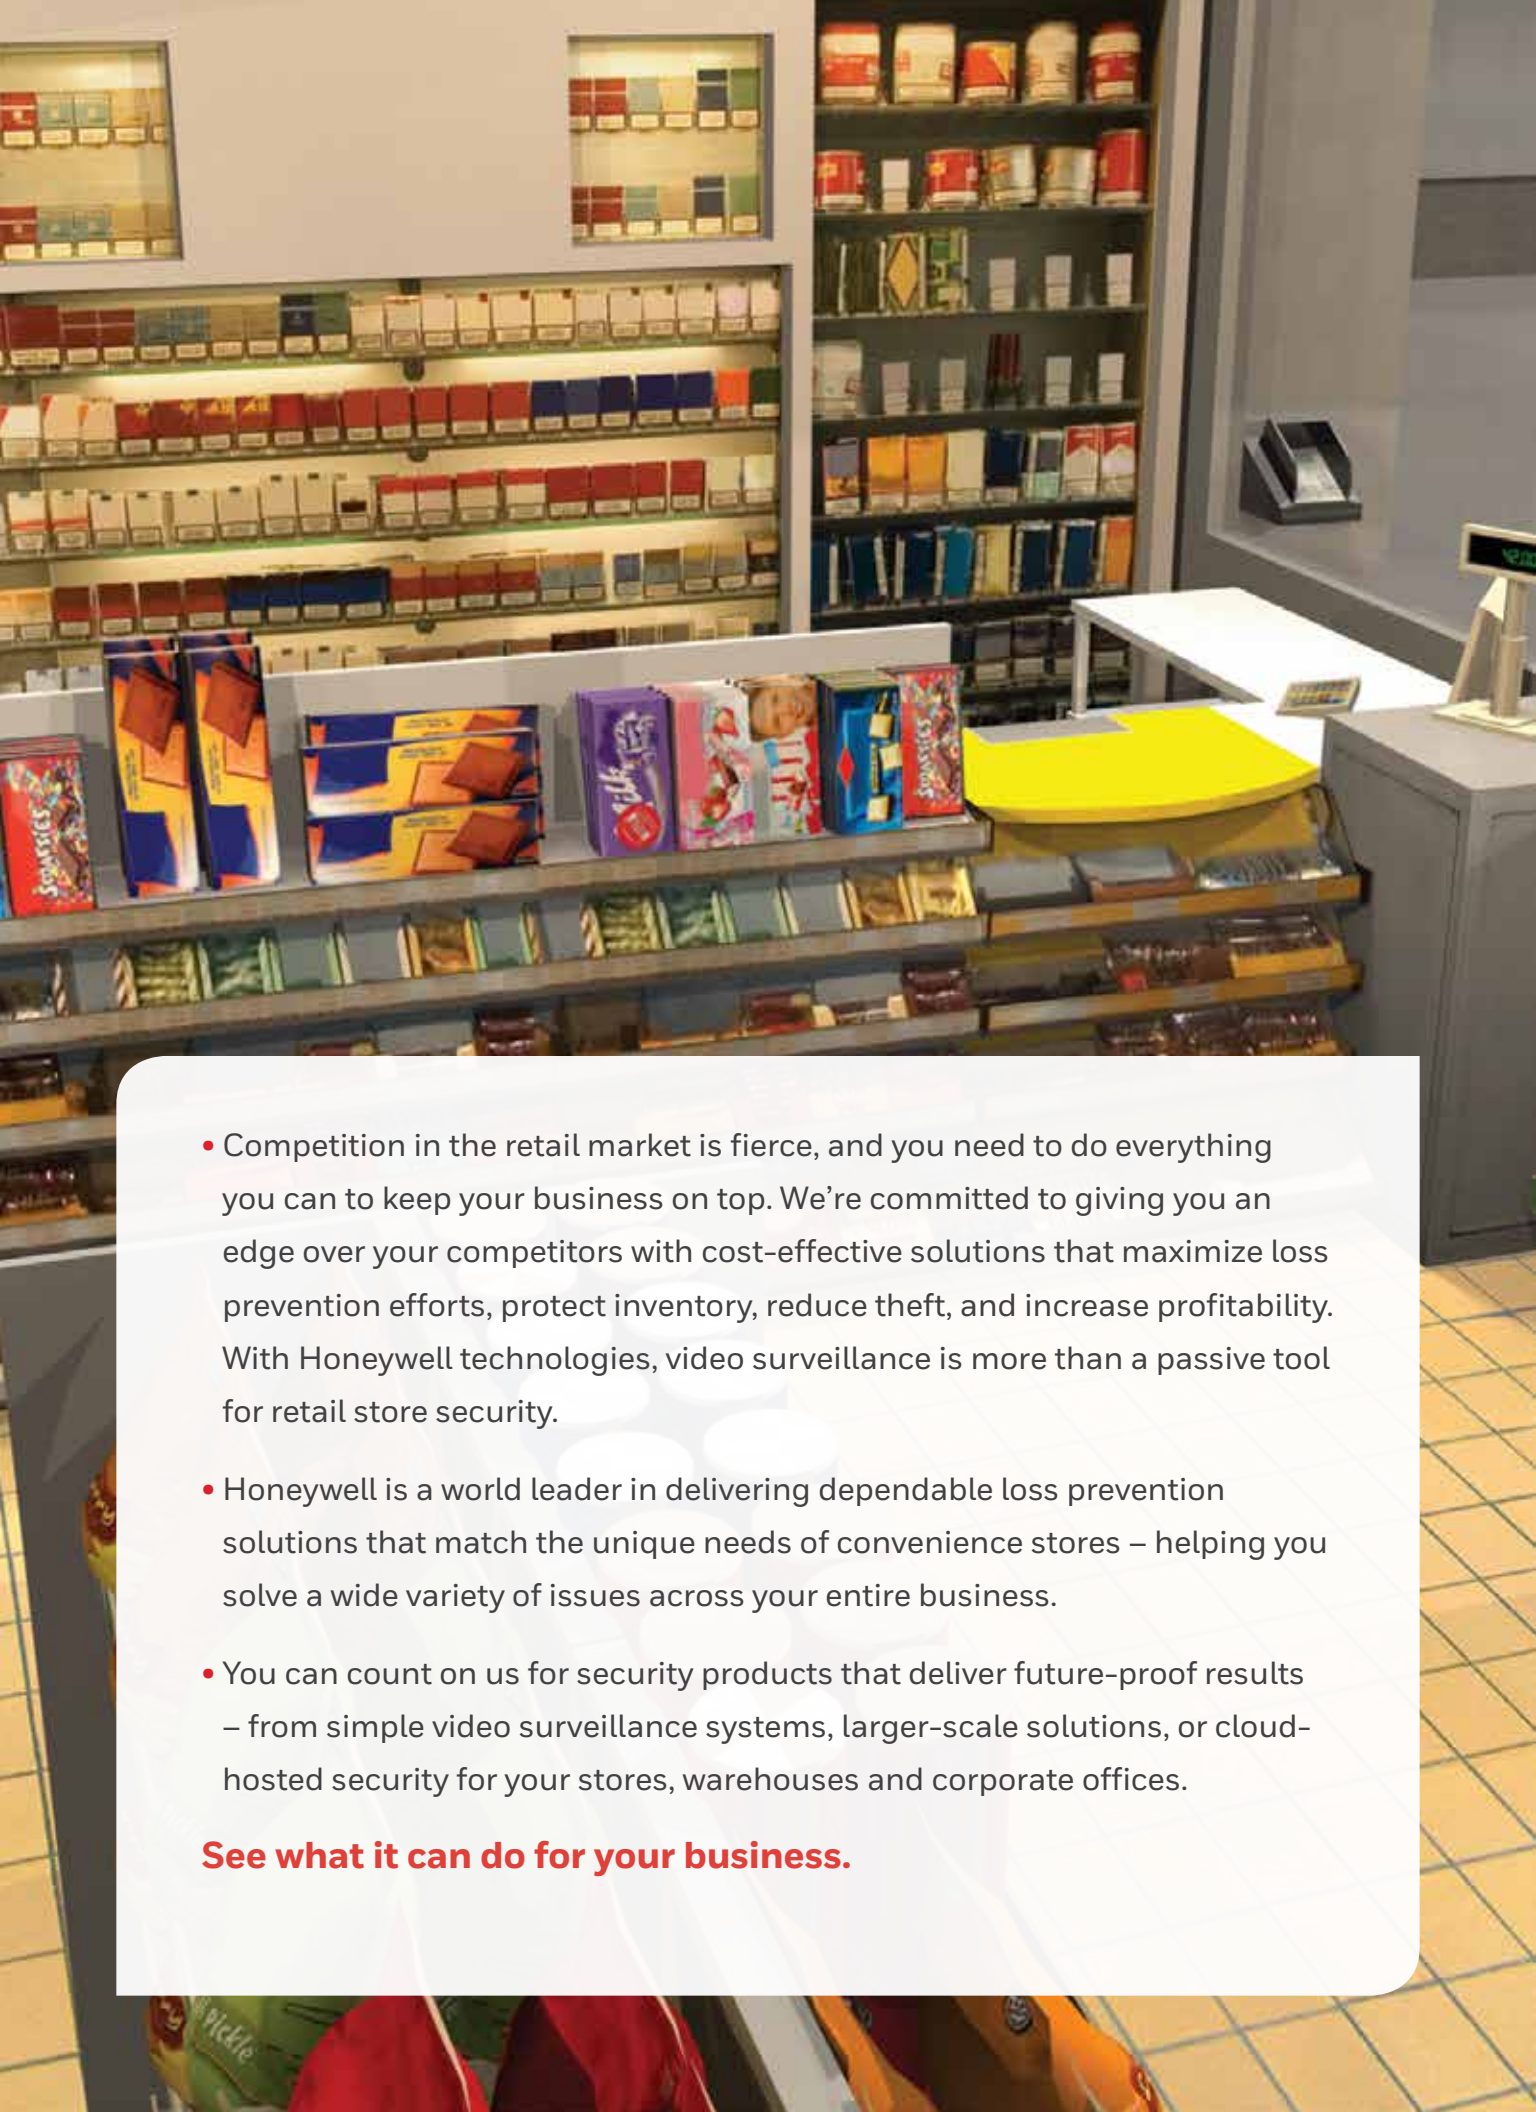

### **Performance Series IP**

For the sharpest images possible, our IP line offers up to 4K resolution quality. In a range of form factors, our indoor/outdoor cameras and embedded NVRs are cloud ready, and the embedded NVRs incorporate the exclusive I-View Now® technology which takes the guesswork out of alarms. The hi-res Performance Series IP line is perfect for a wide range of video verification and surveillance applications including small to mid-size retail outlets.

### **I-View Now®**

When an alarm is real, every second counts. Central station operators need the full picture in order to make informed dispatch decisions. Video alarm verification (VAV) provides real-time, situational awareness into the protected premise for alarm confirmation – helping to determine event severity and significantly reducing the time and costs associated with false alarms. I-View Now is a patented, cloud-based central station interface that makes video alarm verification as easy as pushing a button. VAV provides reliable, uninterrupted video recordings so that central station operators can accurately verify and discover the real cause of the alarm.

- 
- Competition in the retail market is fierce, and you need to do everything you can to keep your business on top. We're committed to giving you an edge over your competitors with cost-effective solutions that maximize loss prevention efforts, protect inventory, reduce theft, and increase profitability. With Honeywell technologies, video surveillance is more than a passive tool for retail store security.
  - Honeywell is a world leader in delivering dependable loss prevention solutions that match the unique needs of convenience stores – helping you solve a wide variety of issues across your entire business.
  - You can count on us for security products that deliver future-proof results – from simple video surveillance systems, larger-scale solutions, or cloud-hosted security for your stores, warehouses and corporate offices.
