

## Looks Are Important!

Upgrade your KD6, HD6 and ACUIX™ Analog PTZ Dome Cameras to HD IP with no change to ceiling appearance.

Upgrading existing PTZ gaming cameras can present numerous challenges. Honeywell has addressed these with a simple upgrade path for existing KD6, HD6 and ACUIX PTZ customers. The HDZ family of PTZ cameras from Honeywell can be quickly installed into existing ceiling cutouts using the HDZ back can model or HDZHINKIT which converts a pendant HDZ to in-ceiling installation. The original lower bubble can be reused or updated, maintaining the appearance of the original installation. No need to cut new holes or patch ceilings. The HDZ series offers a variety of IP models as well as an analog version for customers who are not quite ready to deploy IP. No network cabling? No problem. Contact us for recommendations on Ethernet Over Coax (EOC).

Don't get caught off guard! Start planning your IP migration strategy today. Honeywell can assist you, no matter who your current CCTV provider is.

**It's brilliant. It's easy.**  
**...and it's affordable!**

### Product Features

- 1080p HD images at a guaranteed 30fps to meet gaming regulations
- Subliminal latency on IP models
- HDZ series PTZ cameras come standard with true day/night and wide dynamic range for dimly lit or back lit applications
- Image stabilization on all 30x models
- 24VAC or PoE+ power options
- Multiple color options on lower domes
- Attractive low profile trim rings

**HD QUALITY WITH  
NO NEED TO  
CUT NEW HOLES OR  
PATCH CEILINGS!**

### Benefits

- Crystal clear, color correct images: See every detail of cards, people and activity, leading to positive determinations and resolution of security and surveillance issues
- Suitable for any ceiling height. 30x provides more wide angle and telephoto than previous models.
- Affordable: Less expensive and less time consuming than cutting and patching ceilings
- Easy to use: Replace the camera and back can and reuse the existing lower dome

## Why Choose Honeywell's HDZ Family?

- Crystal clear images enable positive identification of objects, people and activity
- Affordable solution—more economical than repairing hard ceilings. No additional labor costs.
- Maintain property appearance—reuses the existing lower bubble so the appearance of the ceiling does not change
- Incredibly low latency
