Date: February 2018 Marketing Update M18

Velociti Laser Spot Detector Discontinuation Notice

Dear Gamewell-FCI Customer,

As a result of a component obsolescence used in our laser detector line, System Sensor will discontinue the laser detector line as indicated in the models referenced below. We anticipate releasing a direct replacement using new technology as part of our Velociti Series 3 product line in May, 2018. The new high sensitivity detector offers very early warning in a spot detector format and can be used as a drop in replacement for the current laser spot detector. In addition, as a high-volume manufacturer of a wide variety of products, we offer a range of alternative products including our FAAST and VESDA aspiration lines, available today pending your application needs

The product(s) below will be discontinued as of April 30, 2018. Replacement or alternative products have been indicated where applicable. Please place any final orders for these products on or before April 1, 2018 to ensure delivery. Please also communicate this information to your purchasing and sourcing counterparts and notify your marketing and regulatory departments to update data sheets and panel compatibility charts at the necessary agencies, where applicable.

Old Model Number	Old Model Description	Replacement Model Number	Replacement Model Description/Notes	Available
ASD-LS	LASER SMOKE DETECTOR SYSTEM SENSOR	ASD-LS3	LASER SMOKE DETECTOR SYSTEM SENSOR WHITE	May 2018
		ASD-LS3-IV	LASER SMOKE DETECTOR SYSTEM SENSOR IVORY	May 2018

Should you require assistance or if you have any questions, please contact your Customer Service Representative.
