

Relay Option Module Enclosure Released

October 23, 2009
Document FLPA09-10-2

Fire-Lite Alarms is pleased to announce the availability of the new UL listed **Relay Option Module Enclosure**. The **ROME** (Relay Option Module Enclosure) is shipped with one **ANN-RLY** Module installed. The **ANN-RLY** Relay Module provides ten programmable Form-C relays when used with a compatible **FACP** (Fire Alarm Control Panel) using the **ANN-BUS** communication circuit. The **ROME** can be installed remotely up to 1250 feet away from the **FACP** location, in an Elevator, Electrical or Mechanical room reducing the wiring cost and installation time.

The **ROME** contains the following:

- One Red Back box (15"H x 14.5"W x 2.75"D) with lock and key
- One **ANN-RLY** Relay Module and One **ANN-MBRLY** bracket installed
- Product Installation Document

The **ROME** provides mounting space for one additional **ANN-RLY** Relay Module or one addressable Multi-Module.

To add an additional second **ANN-RLY** Relay Module to **ROME**:

ANN-MBRLY: mounting bracket required
ANN-RLY: Relay Module

To add addressable Multi-Module to **ROME**:

MULTIMOD-BRKT: Mounting Bracket required
Addressable Multi-Module one of the following; **MMF-300-10(A)**, **MMF-302-6(A)**, **CRF-300-6(A)**, and **CMF-300-6(A)**
