## [SpectrAlert® Advance Decals Now Available Separately](#)

### Document FLPA11-02-1

Effective January 1, 2011, System Sensor discontinued shipping decals with their non-pad-printed SpectrAlert® Advance audible visible notification devices (noted with a “-P” suffix). This streamlining effort now enables you to purchase the DECAL models separately from the device if needed. Each decal comes with label options for AGENT, EVAC, ALERT or FIRE to add to the devices. The following table lists the model numbers and descriptions:

Model #	Description
DECAL-R	Red wall decals; 10 total decals per box for white devices (enough to label 5 wall devices*)
DECAL-W	White wall decals; 10 total decals per box for red devices (enough to label 5 wall devices*)
DECAL-RC	Red ceiling decals; 15 total decals per box for white devices (enough to label 5 ceiling devices*)
DECAL-WC	White ceiling wall decals; 15 total decals per box for red devices (enough to label 5 ceiling devices*)

\* NOTE: Each wall device typically has two labels; each ceiling device typically has 3 labels
