

HONEYWELL SECURITY PRODUCT BULLETIN

November 2007

Honeywell Security & Custom Electronics – UK

New G2 High performance, simple delivery! Built on Galaxy technology.

Honeywell Security's commitment to innovation has culminated in the exciting pan-European launch of the NEW G2. This NEW offering provides great performance and simplicity, thanks to its unique system architecture and best in class wireless technology. Combine this with feature rich capabilities such as multiple communications (IP, GSM, PSTN), integrated door control (using MAX reader) and recognized audio verification and this makes the NEW G2 system the perfect solution for small commercial sites.

Key Facts about the G2:

The G2 includes a new version of the RF Portal (C079). These products replace the existing Galaxy 2 series range and the RF Portal (C077). The new G2 panels will retain the same part numbers as before and are fully interchangeable with previous products.

A variety of new 2-way wireless peripherals with unique Honeywell Alpha Protocol, are available for use with the new G2 RF Portal (C079). Peripherals are listed in the table below.

Customers that are users of Remote Servicing Software will benefit from an updated version of the ACCeSS Lite. CDs will be sent to registered users free of charge.

Start benefiting from the best in class technology and Honeywell's continuous innovation, new promotional material is available to support your business.

The NEW G2 is Now Available:
