W2 and L2 Series Directional Couplers Discontinuation

In anticipation of the launch of our new RF Tappers, Fiplex is phasing out W2 and L2 series directional couplers and is no longer accepting orders for the W2 series directional couplers. To ensure we have a temporary alternate device available to our customers, we have reduced the price of the L2 series directional couplers to match the price of the W2 series. We apologize for any inconvenience. Learn more and see a full list of series equivalent products here.

Coming Soon: RF Tappers

We are excited to share the upcoming launch of our new line of RF Tappers. The RF Tappers will replace our W2 and L2 series directional couplers and are anticipated to be available for order in early December.

The RF Tappers offer these unique features and more:

- Support for all Public Safety frequency bands with a single device
- Smaller size for easier installation and smaller junction boxes
- Unique symbols for quick model identification
- Simpler installation due to lack of directionality
- Priced lower than directional couplers
