Honeywell

Date: June 2023 Marketing Bulletin HW23.6

To: All Engineered System Distributors (ESD)

Extension of Master Pack Effective Date

Based on Partners feedback, including the need for time to modify systems and business processes for ordering in Master Pack quantities, Honeywell has extended the effective date of our Master Pack initiative to September 1, 2023. We will continue to allow product orders at the listed price in any quantity until the September 1 deadline.

This extension will give Honeywell and our partners time to optimize how we implement this initiative and ensure we can collectively realize the benefits of simplified ordering by reducing shipping and handling costs, reducing the potential for shipping damage, and improving sustainability.

For reference, please see bulletin HW23.3 for the original communication. A comprehensive list of products exclusively available in Master Pack quantities, including their corresponding quantities, can be found in the latest edition of our Price Books.

Please contact your sales representative if you have any questions and continue to share your feedback so we can expand initiatives like Master Packs for our Distributors.

Sincerely,

Ahmad Althwabteh
Senior Offering Manager
