FIPLEX PRODUCT ANNOUNCEMENTS

At Fiplex by Honeywell, we are committed to providing innovative products that make buildings safer and delivering best-in-class customer service. With that in mind, we are making some changes to streamline our product offerings, so they are easier to use and enable our team to provide you with improved support. Here are the first few updates we will be making in 2024. Stay tuned for more exciting updates to come.

Part Number Reductions: VHF/UHF BDAs, Fiber DAS, and External NEMA4 Duplexer Products

We are pleased to announce that Fiplex by Honeywell's products are now easier to order than ever. To streamline our product offering, we have reduced over 700 SKUs from our VHF/UHF parts catalog. It is important to note that we are not discontinuing any hardware configurations and can continue to support our customers with the same technology we have been offering since the launch of the FLEX series. Please stay tuned for our updated 2024 Parts and Pricing List, which will be distributed to our customers in the coming weeks.

Learn more about the key changes to Fiplex by Honeywell's parts catalog here.

Price Reduction: Flex Series Public Safety Centric Small DAS for 700/800MHz

We are pleased to announce a price reduction on the Fiplex by Honeywell 700/800MHz Public Safety Centric (PSC) Small DAS product line. This product is now the most cost-effective solution for serving single or multiple buildings from approximately 600k square feet up to 1M square feet. Stay tuned for future updates to the Flex PSC Fiber DAS line in 2024.

The Flex PSC Small DAS offers these unique features and more:

- Support for 700/800MHz Public Safety frequency bands
- Fully digital platform with digital optics and digital signal processing
- Fully channelized Master and Remotes—Field programmable Class A or Class B modes with a variety of digital filter options
- Master unit provides a mobile RF output to feed a local DAS
- Master can be installed in a stand-alone mode or connected to 1 or 2 digital remote units. Can provide coverage up to 3 zones.

Learn more and see the full product announcement and pricing here.

Discontinuation Notice: Flex Enterprise Series Fiber DAS Products

Beginning February 1st, 2024, we will no longer be accepting orders for products in the Flex Enterprise Fiber DAS series. We will continue to offer the Public Safety Centric (PSC) Fiber DAS, which is a superior product designed specifically for mission-critical public safety communications, and continue to improve and develop this line.

Learn more and see the full list of discontinued Enterprise Fiber DAS part numbers here.

Discontinuation Notice: HONBDA-BTTY-ANN-4 Remote Annunciator

We have run out of stock of the HONBDA-BTTY-ANN-4 Remote Annunciator and will no longer offer this product. We have launched the new HONBDA-BTTY-ANN-6, which will be the direct replacement at the same price.

The new HONBDA-BTTY-ANN-6 offers these unique features:

- Remote annunciation of visual (LED) and audible (Buzzer) alarms at a remote location.
- Supports distances of up to 1000ft using CAT5/6 ethernet cable terminated with RJ45 connectors.
- New flush mount design and conduit knockouts allow for a simpler and cleaner-looking installation.

Learn more and see all the benefits of the new Remote Annunciator here.
