CLSS Device Ownership Transfer Launch

We are pleased to introduce a new device ownership transfer feature for CLSS Gateways & Pathways. This feature is designed to accommodate your diverse application needs and business models and provide enhanced monitoring capabilities.

Device Ownership Transfer Highlights:

- If you do not offer monitoring or did not win monitoring in a project, you will be able to transfer monitoring capability/license along with the monthly subscription cost to another company with a CLSS account (ESD or Dealer)
- Supported Transfer Types:
  - **Full Transfer for CLSS Gateway and Pathway**: Supports transferring the CLSS Gateway or Pathway ownership completely to another ESD/Dealer, recommended if another company is taking over the building/project and you no longer need access.
  - **Monitoring Transfer for CLSS Gateway only**: Supports transferring CLSS Gateway ownership partially for monitoring only to another ESD/Dealer. This is recommended if another company is taking over the central station monitoring only, and you still need shared access to the Gateway for other CLSS features like Facility Manager, Checkpoint, Horizon, etc., The ESD/Dealer taking over the monitoring will also take responsibility for CLSS monthly subscription cost/license for monitoring once they accept the transfer request.

NOTE: You can access CLSS Tutorials to learn more under Help in your CLSS login. For CLSS Technical Support., please email CLSS.TECH@Honeywell.com or contact 1- 480-936-7425 M-F; 8 AM-5 PM EST

Sincerely,

Mahesh Nanjakla
