Connected Life Safety Services (CLSS) Simplified Pricing

New Simplified Pricing is LIVE

In the spirit of continuous improvement, new simplified CLSS pricing has gone live in April 2024. New prices are available on the CLSS website.

The new simplified pricing model offers important capabilities:

- Aligns with how you do business. Our offerings are now simpler and work well with your monitoring, test and inspection, and other services.
- Offers flexibility with different services like central station alerting and test and inspection. You can pick and choose the services you want and not pay for the services you don't.
  - The Gateway Silver license is now divided into three different offerings: Enhanced Monitoring, CheckPoint, and CheckPoint Premium – allowing you to select what you need.
  - Additional cellular charge on Gateways was discontinued starting April 5th.
- Provides control by enabling you to turn off auto-renew for monitoring licenses if you do not wish to continue those services at specific customer sites.
  - One-year free Gateway Silver license was discontinued starting April 5th.
  - One year free "Enhanced Monitoring" licenses will continue for Pathways series 2 and 5 while supplies last.
  - Free CheckPoint with Pathways was discontinued on April 5th.

April/May invoices will include all renewals at the new pricing rates and your usage of services according to the new, easy-to-understand pricing system. Please note that you will receive a combined April/May invoice to avoid unnecessary effort on your end.

We remain committed to providing new and improved solutions to our valuable customers and end users and appreciate your continued support and patronage.
