To: All Engineered System Distributors (ESD)

Area of Refuge (AOR) Portfolio

Honeywell Fire is pleased to announce the addition of an Area of Refuge (AOR) portfolio through a licensing agreement with Talkaphone. This portfolio includes a range of solutions designed to meet the needs of small-to-medium buildings. These NFPA and ADA-compliant two-way emergency communication, or Area of Refuge (AOR) solutions, help enhance the safety and security of your buildings.

Mandated by the International Building Code (IBC) for new construction, significant remodels or building reclassification, AOR Systems are found in areas such as elevator landings or areas of rescue assistance. These systems become essential regardless of whether the building is protected by a sprinkler system, ensuring comprehensive safety.

What are the key advantages of a Honeywell AOR Solution?

- **Code Compliance:** Ensure adherence to crucial building codes such as IBC, NFPA 72, A117.1, and ADAAG, safeguarding regulatory compliance.
- **Operational Efficiency**: Experience streamlined annual testing and continuous supervision, guaranteeing optimal performance without disruptions.
- **Flexibility**: Benefit from versatile deployment options tailored to accommodate projects of varying scales, providing adaptability and scalability.
- **Power Backup**: With a built-in UPS, providing up to 24-hour (HON-AOR-5/HON-AOR-10) or 4-hour (HON-AOR-16/HON-AOR-24/HON-AOR-32) power backup during outages, ensuring uninterrupted functionality.
- **Listed to UL 2525 Standard**: This expedites the issuance of a Certificate of Occupancy (COO) without the need for a separate site listing, saving valuable time and costs.

ESDs can purchase this portfolio addition exclusively through our participating wholesale distribution partners, ADI and WESCO. These purchases can be applied to registered IGNITE Program accounts, adding to the total revenue spend that applies to your tier status in the *catalyst* Partner Program.

You can learn more about the AOR offering here. For datasheets, engineering specifications, manuals, and contacts, please visit www.honeywellareaofrefuge.com

Thank you for your continued dedication to the fire & life safety industry.
