To: Farenhyt Series Platinum Distributors

Train the Trainer Program (TTT) Available for Platinum Farenhyt ESDs

Save travel time & tuition costs with the flexibility to train at your office when you self-certify internal staff on Farenhyt training.

Honeywell and the MyHBU Training Team are excited to announce the launch of a new program exclusive for Farenhyt Platinum Engineered System Distributors – **Train the Trainer** (TTT). This program will enable our Platinum Distributors to administer our factory-approved training curriculum in your facility on your schedule, saving your technician's travel time and tuition costs with the flexibility your busy business needs.

How Does Train the Trainer (TTT) Work?

By sending a previously factory-certified technician to the Train the Trainer program, they will be certified to administer Farenhyt factory-approved training for anyone within your business.

- Train the Trainer program will allow an experienced factory-trained employee at your company to get certified in conducting Farenhyt training.
- Only internal staff within a Platinum-tier ESD business can be trained by an approved Train the Trainer. We will not allow end-users or ESD technicians from another company to get trained by the certified TTT.
- Employees interested in TTT must complete two steps to qualify fully:
  - Step 1: Complete the Train the Trainer certification class (In-Person Course)
  - Step 2: Once the in-person course is passed, a Honeywell trainer must audit that Trainer's first session (in-person) or attend a live camera feed of the session (virtual).
- If you are authorized to sell multiple Honeywell ESD brands, your TTT can get certified in training in those brands if they agree to an in-person audit by one of our Honeywell trainers for that brand. Each brand will require a separate 3-day audit and associated fees.

Costs and Curriculum

By training as few as 10 technicians, your business can justify the investment into the Train the Trainer (TTT) program.

- TTT class is a 2-day training covering the concepts of instructor-led training, including techniques, classroom etiquette, content, timelines, lab work, and safety. This class is required in person at either St Charles, IL (System Sensor) or Northford, CT (Honeywell Fire Factory) facilities.
  - TTT Certification 2-Day Class (per student wanting TTT certification): $3,000
  - TTT Audit (Honeywell trainer views first TTT class to audit the training): $2,500
  - Factory certification cost to attend an internal TTT class (per student): $500

Registration and TTT Program Availability:

If your company is interested in having an employee Train the Trainer certified, please email Brandon Pyshora, HBT Fire Training Manager: brandon.pyshora@honeywell.com.

Class availability will be once a quarter, with the next class scheduled for Dec 4-5, 2023, in St Charles, IL. Please email myhoneywellbuildingsuniversity@honeywell.com for future dates or visit https://myhoneywellbuildingsuniversity.com/ to see the course calendar

We look forward to supporting your training needs.
