Honeywell | Farenhyt™ Series

Date: June 2024 Marketing Bulletin M24.5

To: All Farenhyt Series Distributors

ERCES Update – Full Fiplex Portfolio Purchasing Options
Available Direct or through Distribution
Effective July 1, 2024

Fiplex by Honeywell is pleased to announce the entire ERCES portfolio is now available in the recently released ESD Price Book (effective July 1, 2024) giving our ESD Partners the choice to buy direct or through our several wholesale distributors. These updates are meant to give our Partners more ways to gather products when needed.

Effective July 1, 2024:

- The 700/800 MHz, 0.5W to 2W ERCES offering (BDA, BBU, All-in-One, Passives including Cable, PCTEL, and training tools) will be available directly in the ESD price list and through several Honeywell Fire wholesale distributors: ADI, Wesco (formerly Anixter), JEM Systems, and (Coming Soon) Brooks Equipment.
- ESDs requiring portions of the ERCES portfolio not available through distribution (5W BDAs, Fiber DAS, VHF/UHF) for specific projects will now be available directly in the ESD price list.
- Parts on the ESD price list will also be available through e-commerce for ordering.
- All new estimates from flexbda.com will show the net price instead of the list price. The discount from the list remains the same at 25% for parts purchased directly, regardless of the ESD *catalyst* Partner Program tier level.
- ERCES iBwave design service will still be offered directly and remain on your ESD price list.

Your company's designated pricing contact has received updated price books. Reach out to your sales representative or email fiplexsales@honeywell.com if you have any questions.

We appreciate your support for Fiplex products and your continued dedication to keeping our first responders connected.
