SpectrAlert® Advance Low Frequency (520 Hz) Appliances Available Again for a Limited Time!

Due to recent supply chain challenges impacting the L-Series low frequency product offering combined with high demand and strong market feedback, System Sensor is pleased to announce that SpectrAlert Advance low frequency (520 Hz) audible visual (AV) notification appliances are available again for a limited time only.

The SpectrAlert Advance line of low frequency sounders and sounder strobes were the first notification appliances on the market to meet NFPA 72 sleeping space requirements that require a lower 520 Hz frequency and square wave tone and are known for their ease of use and reliable performance.

Like the rest of the SpectrAlert Advance offering, these appliances include a variety of features that increase versatility while simplifying installation. Each device is available with red or white plastic housings and features a plug-in design and universal mounting plate for quick installation. In addition, these devices are compatible with all System Sensor SpectrAlert, SpectrAlert Advance and L-Series AV notification appliances for use in both new and retrofit applications.

The SpectrAlert Advance low frequency product line is available to order now for a limited time only! Supplies are limited and once inventory is depleted, these SpectrAlert Advance low frequency devices will no longer be available. Please contact your Customer Service Representative at 1-800-736-7672 for ordering and pricing information or visit your eCommerce site to place an order. For more information, visit systemsensor.com/LF .

Please note that due to this unique limited time offer, product returns will not be accepted for SpectrAlert Advance low frequency devices. However, the System Sensor standard three year limited product warranty still applies on all devices.

Orders will be taken while supplies last.

MODEL NO.	DESCRIPTION	TEMPORARY SUBSTITUTES
HR-LF	LOW FREQUENCY 520 HZ SOUNDER, RED	HRL-LF
HW-LF	LOW FREQUENCY 520 HZ SOUNDER, WHITE	HWL-LF
