CLSS Gateway – Advanced Notifications Feature

NOTIFIER is excited to announce the release of the **CLSS Gateway – Advanced Notifications** feature. This feature provides a communications link between the NOTIFIER system and third-party software systems, allowing fire system events to be distributed to third-party software solutions. The CLSS Gateway – Advanced Notifications feature uses APIs to present fire system events to third-party software systems and is enabled by selecting the third-party system in CLSS Site Manager.

Designed to support a broad network of third-party software providers, we are pleased to announce unidirectional integration with Intrado Revolution in this release. Intrado Revolution is a comprehensive mass notification platform which communicates critical information efficiently and reliably to improve the safety of building and campus occupants in emergencies.

The **CLSS Gateway – Advanced Notifications** feature is powered by the CLSS platform and offers the following valuable benefits:

- **Seamless Integration…**select applicable third-party software system in CLSS
- **Compatibility:** Supports **NOTIFIER® INSPIRE** and ONYX panels
- **Scalable:** Connect an unlimited number of buildings… NOTIFIER fire alarm control panels (FACPs) and NOTI•FIRE•NET™ (NFN) networks
- **Secure connection** to CLSS Platform

As previously announced in ***NOTIFIER Product Bulletin M22.6*** **effective May 6, 2022, the CAP gateway (p/n CAP-GW) will be discontinued.**

This CLSS Gateway – Advanced Notifications feature is available to purchase now on www.fire.honeywell.com. Please refer to the website for product documentation.

If you have any questions regarding this new offering, please contact your Regional Sales Manager. For any technical questions pertaining to this notice please contact NIS Technical Service at 1-877-996-6647 or NIS.Tech@Honeywell.com.

Thank you for your business and continued support.

Sincerely,

Michele Ottavio

FAQs

1. What is the pricing for CLSS Gateway – Advanced Notifications?

The price is:

CLSS Gateway – Advanced Notifications	Annual Fee - per Fire Panel	300 tokens

The CLSS Gateway – Advanced Notifications price is the fee for connection to 3rd-party software systems and does not include the cost for the 3rd-party software.

2. How do I order and activate the CLSS Gateway – Advanced Notifications feature?

- The CLSS gateway (p/n HON-CGW-MBB) can be ordered from Honeywell Customer Service.
- The Advanced Notifications feature can be purchased on CLSS Site Manager.

Refer to CLSS Gateway – Advanced Notifications training module located under ⓘ in the upper right-hand Navigation bar on Site Manager.

3. What gateway firmware is required for the Advanced Notifications feature?

CLSS Gateway firmware 3.1.4.74 or higher is required.

4. Are there any panel firmware updates needed?

The CLSS gateway is compatible with the latest INSPIRE and ONYX panels firmware available on the ESD website.
