Product Announcement

CO1224T & CO1224TR Detectors Now With 10-Year Carbon Monoxide Life

January 2016

NOTIFIER is pleased to announce that our CO1224T and CO1224TR carbon monoxide detectors have begun shipping with a 10-year Carbon Monoxide (CO) cell. We are informing you of this change to give you an opportunity to reduce your inventory of the existing 6-year Carbon Monoxide (CO) cell devices before ramping up orders after the 10-year CO cell is in production.

In order to make this as seamless a transition as possible, we will not be changing our model number with the new 10-year CO cell, but will be updating our labeling and instruction manual to reflect the change. Additionally, the date code found on the packaging can be used to identify the new product as all CO1224 models with a date code of 6114 or later will contain the new 10-year CO cell.

Beginning in February 2017, we will add a red “10-Year End-of-Life Signal” sticker to the CO1224T and CO1224TR packaging to easily identify the new 10-year CO cell life products.

Thank you for your business and continued support.

Sincerely,

Julie Laudano
