New CLSS LTE Fire Communicator

The Telguard TG-7FS adds CLSS Connectivity

NOTIFIER is excited to announce the release of a new LTE Fire Communicator, the first dialer capture solution that connects with Honeywell Connected Life Safety Services in addition to traditional central station reporting. Since it captures DACT output, it works with all manufacturers' dialers and can be used on every install.

Using proven and industry-known Telguard communicator technology, this new offering, the CLSS LTE Fire Communicator starts with Telguard's TG-7FS, but includes exclusive Honeywell-only benefits at no extra charge:

1. If you're already buying Telguard, you can now buy direct from NOTIFIER at a **competitive price** that you can't get elsewhere. And continue to pay the same monthly rate to Telguard that you pay today.
2. **Earn credit** towards your Honeywell Fire direct spend for Co-Op funds.
3. Receive select **CLSS functionality at no extra charge**.

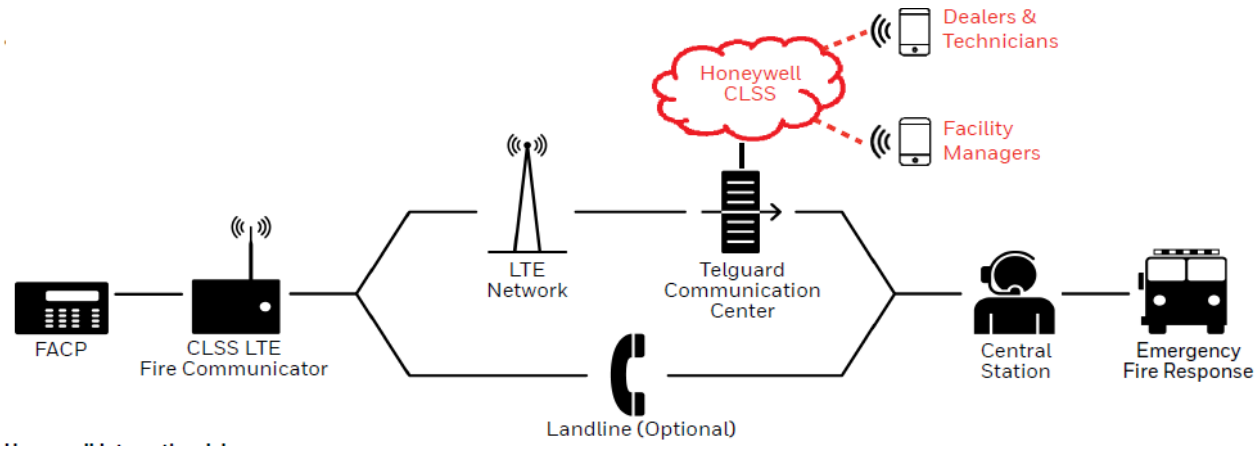

Exclusive connectivity to CLSS - Combining the TG-7FS with CLSS provides real-time alerts when events are sent to the central station, while providing these same alerts to your customers using CLSS Facility Manager. And since the CLSS LTE Fire Communicator works with any panel using DACT outputs, manage all manufacturers you service using a single platform. Be proactive for your customers!

Where to use Honeywell new LTE Communicator? Use this device anywhere you already use Telguard TG-7FS or Honeywell HWF2 communicators.

- For non-NOTIFIER panels
- For upgrades of 3G and POTS to LTE (example: replacing older IPGSM units)
- For new installs

Note: Use of this LTE communicator does not replace using a CLSS gateway for expanded product connectivity like test and inspect functionality. This is reliable alternative when the CLSS Gateway is not an option and customers require site monitoring.

NOTIFIER® by Honeywell

ORDERING INFORMATION - LTE Communicator units are available today for direct only orders. Must be purchased through your NOTIFIER account by reaching out to the Customer Service Team (fire.orders.us@honeywell.com). In the future, special pricing bundles will be available for the communicator and DACT under one SKU. Accessories for the communicator are available through your distributors.

PART NUMBER	DESCRIPTION	AVAILABILITY
HW-TG7LAF02	LTE Fire Communicator for AT&T	Today direct through Honeywell
HW-TG7LVF02	LTE Fire Communicator for Verizon	Today direct through Honeywell
DACTE3-HWTG7LA	DACT-E3 and LTE Fire Communicator for ATT (Bundle)	Future direct through Honeywell
DACTE3-HWTG7LV	DACT-E3 and LTE Fire Communicator for Verizon (Bundle)	Future direct through Honeywell
ACD-12	Low Loss Cable – 12ft	Purchase through your distributor
ACD-35	Low Loss Cable – 35ft	Purchase through your distributor
ACD-12	Low Loss Cable – 50ft	Purchase through your distributor
ACD-12	Low Loss Cable – 100ft	Purchase through your distributor
HGDL-0	High gain directional LTE antenna	Purchase through your distributor
EXDL-0	External omnidirectional LTE antenna	Purchase through your distributor

See datasheet HON-62049 for more features and specifications of the new LTE Communicator.

List price is below.

Description	Part Number	List
CLSS LTE Fire Communicator, AT&T	HW-TG7LAF02	$575.00
CLSS LTE Fire Communicator, Verizon	HW-TG7LVF02	$575.00

Thank you for your business.
