NOTIFIER by Honeywell

Product Announcement

New Lower Price for IntelliQuad PLUS!

February 14, 2014

IntelliQuad PLUS

IntelliQuad PLUS w/B200S

Dear Valued Business Partner,

The IntelliQuad PLUS Advanced Multi-Criteria Fire/CO Detector remains the world's most accurate fire detector, PLUS the ability to monitor and process carbon monoxide as a distinct signal. Already delivering significant value by providing life safety protection, with separate indications for smoke and CO, and superior nuisance alarm immunity in a single detector, NOTIFIER is pleased to announce a new reduced price for the IntelliQuad PLUS.

Effective February 14, 2014 the net price of the FCO-851 (IntelliQuad PLUS) will be $102.00.

When combined with the B200S intelligent, addressable, programmable sounder base the IntelliQuad PLUS provides smoke detection, heat detection, CO detection and local annunciation eliminating the need for the installation of multiple separately mounted devices. The IntelliQuad PLUS is ideal for applications that require smoke and CO detection, such as hotels, dormitories, condominiums, apartment buildings, healthcare and day care. Please refer to the IntelliQuad PLUS datasheet and the Advanced Detection section of the NOTIFIER World of Solutions brochure for additional information.

To place an order for the FCO-851 please contact your NOTIFIER Customer Service Representative.

Sincerely,

Daniel Corbett
Product Manager, NOTIFIER
