NOTIFIER by Honeywell

Product Announcement

Redesigned Isolator Base (B224BI) and Relay Base (B224RB)

December 21, 2011

Overview

NOTIFIER is pleased to announce the launch of the redesigned B224BI intelligent isolator base and B224RB intelligent relay base beginning January 3, 2012. Pre-wiring the supplied mounting plate saves installation time and reduces potential field wiring faults. The flush-mount base, with System Sensor family look, results in improved aesthetics. These bases are backwards compatible for use with legacy systems or in retrofit applications.

Orders for the legacy bases will continue to be filled as on-hand quantities allow. Once our current inventory of legacy bases has been exhausted all new orders will be converted to the redesigned bases. Model numbers and pricing remains the same.

Old Design	New Redesign
	

Ordering and Availability

Please contact your NOTIFIER Customer Service Representative to place an order for the B22RB relay base or B224BI isolator base.

Questions

For questions on the B224RB or B224BI please contact NOTIFIER Technical Services at 1-800-289-3473 or NOTIFIER.Tech@honeywell.com
