e*V*ance™ Service and Inspection Manager
Ad*V*antage **you**!

NOTIFIER is pleased to announce the launch of our eVance™ Services software, designed to allow your business to efficiently manage operations and improve profitability.

eVance consists of two software applications, **Inspection Manager** and **Service Manager**, designed by NOTIFIER's fire industry professionals. That knowledge, together with our partnership with you, provides us with an unparalleled level of understanding and responsiveness that no other software companies can offer.

Inspection Manager
It starts by connecting your customers' NOTIFIER fire panels to the internet via a web portal. This, together with the Inspection Manager software, allows test information from addressable points to be transferred directly to your handheld device. Non-addressable points are easily integrated using barcode labels and scanners.
The result? No longer do you need to have a technician at the panel during a walk test. One technician can perform the walk test alone…or multiple technicians can conduct a walk test simultaneously…*reducing the time to complete these annual tasks by at least 50%*!

Service Manager
The Service Manager application puts any information necessary to schedule service calls into a single application: customer information, fire system details, event and service history, real-time diagnostic data and technician availability – all with an intuitive user interface that accelerates dispatch procedures.
The result? A single application for job tracking, calendars and report storage, eliminating duplicate data entry into multiple programs…and *a virtual representation of all customer job site and technician locations to enable faster and more efficient responses to service calls*.

eVance is the *only* software solution that can offer direct connectivity with NOTIFIER, delivering features that leverage integration and automation in ways no one else can.

Please refer to the attached eVance Services Product Overview for additional details on this powerful new set of software tools, available NOW! Contact your Regional Sales Manager or our eVance National Sales Manager, Rich Fischer (Richard.Fischer@Honeywell.com), to learn more or schedule a demonstration.

Co-Op funds: Be sure to ask your Regional Sales Manager how to take advantage of our *limited time offer* to use Co-Op funds to offset the costs of these software tools, web portals or barcode scanners to help get you started!
