## Product Announcement

**New Resources Available! NOTIFIER Battery Calculations - Version 2.6 AND SWIFT Firmware Suite**

**August 2017**

NOTIFIER is excited to announce the latest updates with our Battery Calculations tool and SWIFT Tools. Battery Calculations, Version 2.6.1, and SWIFT Tools, Version 2.5 include many new enhancements as outlined below.

**Battery Calculations, Version 2.6.1**

- New L-Series System Sensor Notification Appliances added to the database. should now be available in each of the battery calculation sheets
- New L-Series devices added to the HPFF8 and HPFF12 power supply battery calculation sheets. These are separate stand-alone sheets and do not use the Notifier device database so they had to be added to each individual sheet.
- SWIFT FWSG Flashscan Wireless Gateway added to the appropriate sheets
- Removal of discontinued System Sensor SpectrAlert devices from the database
- New Notification appliance devices that are added to the database will now correctly appear in each of the battery calculation sheets.

**Microsoft Office Configuration Settings**

| OFFICE 2000, XP, and 2003 | OFFICE 2007 and above |
|---|---|
| 1. Launch a blank Excel sheet.<br>2. From the Tools menu select Macro -> Security...<br>3. Select the Security Level tab (should be selected by default, if not select it.)<br>4. Click on the Medium option button<br>5. Click OK<br>6. After opening a Battery Calculation Worksheet, when prompted to run macros, select "Enable Macros". | 1. Open Excel<br>2. Open the Excel Options Dialog Box by clicking the Office Buttor in the upper left<br>and selecting Excel Options at the bottom of the window.<br>3. Select the Trust Center option from the left-hand pick-list, ther click on Trust Center Settings...<br>4. Select Macro Settings from the left-hand pick-list and then select Disable all macros with notification. Note: We do not recommend you choose Enable All Macros.<br>5. Also check the Trust access to the VBA project object model box.<br>**6.** Click OK and close Excel. |

After opening a Battery Calculation Worksheet, when prompted with a Security Warning click on the Options button and select: Enable this Content.

**SWIFT Tools version 2.5**

SWIFT Tools version 2.5 is the latest releases of SWIFT Tools programming and diagnostic utility.

- Windows 10 support
- Automatic W-USB updates (no more manually updating)
- Improvements to the firmware update process
- New visual layout to the update screen
- "Service pack" approach to downloads. No need to manually download one by one device firmware.
- Previously released firmware versions will be included with the SWIFT Tools
- Improvements to Communicator Window by adding divisions to column headings
- Cybersecurity enhancements

These updates are now available on the new website. Upon logging in, you can locate these tools under the Resources tab. For Battery Calculations 2.6.1, click on the Productivity tab. For SWIFT Firmware, click on Firmware tab. **As a reminder, exclusive ESD content can be found on our new website**. If you have not yet registered, we encourage to you please request access. ESD.NOTIFIER.com no longer provides the latest resources or updates and will be taken down soon. To register, please go to www.notifier.com, click on Log In, then click on the Register button and follow the steps to request access.

Thank you for your business and continued support.

Sincerely,

Julie Laudano
