Now Available! Photo/CO and CO Select Series Detectors

NOTIFIER is pleased to announce the launch of our new 951 Series photo/CO and CO only detectors and accessories.

The **photo/CO detector** (FPC-951) is an intelligent, multi-criteria detector incorporating photoelectric and carbon monoxide (CO) detection principles. It offers a cost-effective solution that meets both the UL 268 7th edition standard for smoke detection and UL 2075 standard for system-connected life safety carbon monoxide detection. The dual function of this single device makes it ideal for installations such as hotels, schools and high-rise residential applications that require both smoke and CO detection.

The **CO only detector** (FSCO-951) is an intelligent, addressable detector incorporating carbon monoxide detection principles that meet the UL 2075 standard for system-connected life safety carbon monoxide detection. As an addressable carbon monoxide detector, it eliminates the use of additional modules required for conventional CO units. This allows you to upgrade your addressable fire system to meet CO code requirements in applications with fuel burning equipment such as furnace areas and laundry rooms.

The addition of photo/CO and CO only detectors complements our broad line of addressable specialty detectors allowing you to meet the right level of detection for your applications.

US PART NUMBER	**Detection Principle** **Type**	Photoelectric	Thermal	Infra-Red	Carbon Monoxide (CO)
FCO-951	Fire/CO	X	X	X	X
FPC-951	Photo/CO	X			X
FSCO-951	CO only				X
FPTI-951	PTIR	X	X	X

Listings:

CO detector is UL 2075 listed for system-connected life safety carbon monoxide detection

Photo/CO is both UL 2075 listed for system-connected life safety carbon monoxide detection and UL 268 7th Edition listed

- Meet the rigorous new UL standards for quick detection and reduced nuisance cooking alarms
  - Flaming polyurethane foam test
  - Smoldering polyurethane foam test
  - Cooking nuisance smoke test

Harmonized aesthetic design

- Become the preference for architects focused on aesthetics
  - New modern design
  - Coordinates with other 951 Series detectors
- Support more customer requests with our expanded color offering
  - Bright White, Ivory and Black

10-year Carbon Monoxide (CO) cell life

- Reduce lifetime product costs
- End-of-life warning at the panel

New Model Number	New Model Description
FPC-951	PHOTO/CO DETECTOR, WHITE
FSCO-951	CO ONLY DETECTOR, WHITE
CK300-CO	CO COLOR KIT, WHITE
CK300-CO-IV	CO COLOR KIT, IVORY
CK300-CO-BL	CO COLOR KIT, BLACK

NOTE: The FPC-951 and FSCO-951 only supports Flashscan® Protocol systems. When used with the NFS2-3030, panel must be on Firmware v27.0 or higher. When used with the NFS2-640, or NFS-320, panel must be on Firmware v27.01 or higher.

Please contact your Customer Service Representative at 1-800-289-3473 for ordering information. For any technical questions pertaining to this notice, please contact Technical Service at 1-800-289-3473 or NOTIFIER.tech@honeywell.com

Thank you for your business and continued support!
