

Audible Visible Device Bulk Packs – Available Now

January 29th, 2019

You asked and we listened! Because AV devices are such a large part of an overall fire system, we are introducing bulk packaging for top selling L-Series devices.

Why Buy in Bulk?

AVs are commonly purchased in high volumes. Bulk packs can improve how you order and how product is used in the field.

- Save Money - On average, savings between 7-10% per unit when purchasing in bulk pack versus purchasing single devices.
- Save Time - in the field and on-site by spending less time opening and disposing of multiple individual packages.
- Reduce Waste - and job site clutter by eliminating additional packaging and plastic wrap.

System Sensor Audible/Visual products and Low Frequency Sounder and Sounder Strobe bulk packs are available now for purchase. These models will be offered in individual units or as a ten-piece bulk pack, only direct from NOTIFIER.

Horn Strobes		Low Frequency	
P2RL-BP10	2W RED WALL	HW-LF-BP10	SOUNDER, WHITE
