Now Available! CLSS Gateway HON-CGW-MBB

May 4, 2020

Building on our new Connected Life Safety Services (CLSS) offering, NOTIFIER is pleased to announce the release of our new CLSS Gateway, **HON-CGW-MBB**. This innovative multi-purpose gateway is the key enabler of our existing and future CLSS software and service solutions. In either temporary or permanent applications, the capabilities of the CLSS Gateway will allow you to drive efficiency, maximize customer retention and increase your win rate helping you to grow your business.

The CLSS Gateway offers a direct connection to NOTIFIER panels, providing remote visibility to system events on a web-based dashboard and a convenient mobile application, allowing you and your end users to receive real-time event information anytime, anywhere. This enhanced connectivity and access to rich system data also allows you to perform more efficient installations, commissioning, and inspection activities by providing control capability for panels and addressable devices from the CLSS mobile app.

The CLSS Gateway provides wired and wireless internet connectivity and simplified Bluetooth configuration options reducing installation times and dependency on the site's network infrastructure. Over-the-air (OTA) update capability enables new gateway functionality to be implemented with limited labor effort, positioning you and your end users for the future.

Gain that competitive edge with the new CLSS Gateway!

To learn more about this exciting new offering contact your RSM or click the link below to access the CLSS Gateway webinar.
