NOTIFIER by Honeywell

Important Portfolio Update: Fire-Lite Product Availability through the NOTIFIER Channel

June 2020

NOTIFIER is announcing new changes on product availability for Fire-Lite products for our ESD partners. Historically, our Fire-Lite offering has been designed and specified for growing fire alarm companies looking for non-proprietary products on small/medium size projects.

As part of our broader efforts and investments aimed at streamlining our supply chain, as of July 6, 2020, Honeywell will be making all Fire-Lite products available exclusively through our approved wholesale distribution partners including, but not limited to, the Honeywell Fire Loyalty Program approved security equipment distribution (SED) partners below:

- ADI Global Distribution
- Alarm Products Distributors, Inc.
- Alarmax Distributors, Inc.
- Anixter International, Inc.
- Security Data Supply, LLC.
- Security Equipment Supply, Inc.
- Security Supply, Inc.
- Silmar Electronics, Inc.
- Systems Distributors, Inc.
- The Systems Depot, Inc.

Use our Distributor Finder Tool to locate your nearest authorized Honeywell Fire wholesale distributor.

With this change, Fire-Lite panels, detectors and accessories will no longer be available directly through NOTIFIER price books. Please review the Fire-Lite SKUs file for all impacted products.

Note, if you are registered for the Honeywell Fire Loyalty Program, you will continue to receive credit for your purchases of Honeywell Fire products through wholesale distribution towards your overall business partner numbers. Today, we are not accepting any new registrations or changes to the Honeywell Fire Loyalty Program but hope to offer another registration period in the future.

The last date for orders for Fire-Lite products through your NOTIFIER account is July 3, 2020.
