

Product Announcement

New “BRIGHT WHITE” Addressable Faceplate Modules

August 2017

NOTIFIER is introducing a new update to our addressable module line. Beginning October 1, 2017, our addressable module line will begin shipping with a brighter white faceplate. This update was done to better meet aesthetic design expectations. The new white color is similar to RAL 9003 and will match white System Sensor L-Series AV devices.

- ✓ Model numbers and branding will remain the same as your current offering
- ✓ Packaging for the new product will be clearly marked “BRIGHT WHITE” with a red, circular label

For current and retrofit installations, we will also offer non-branded faceplate bulk-packs in both our traditional ivory and new bright white. The SMB500 ivory back box, will be discontinued, and replaced by the SMB500-WH bright white back box. Please contact your Customer Service Representative at 1-800-289-3473 for ordering and pricing information.
