Product Announcement

SpectrAlert Advance Low Frequency Sounders Now Available!

August 26, 2013

Dear Valued Business Partner,

NOTIFIER is pleased to announce the availability of System Sensor's SpectrAlert Advance Low Frequency Sounder and Sounder Strobes. These devices meet the new code requirements of section 18.4.5.3 of NFPA 72 2010 and 2013 Editions, which requires audible appliances for sleeping areas to provide a low frequency alarm signal, centered around 520Hz.

Low frequency sounders will be required as of January 2014 for all sleeping areas in jurisdictions that have adopted NFPA 2010 or 2013. Typical applications for these low frequency sounders include, but are not limited to, Hotels/Motels, Apartments/Condominiums, Dormitories, Assisted Living and Health Care Facilities. With the release of these new sounders, System Sensor is the first company to provide the market with audible and audible/visual appliances that comply with low frequency alarm signal requirements.

The low frequency sounder is listed to UL 464 for public mode evacuation and the sounder/strobe is listed to UL 464 for public mode evacuation and UL 1971 for Signaling Devices for the Hearing impaired. The devices can be used in 12- or 24-volt systems and can be used with listed compatible panels or power supplies that utilize the System Sensor sync protocol.

All of the low frequency devices are dual listed for wall and ceiling mount installations. The low frequency sounder strobe comes with field-selectable high candela ratings of 135, 150, 177 and 185. Like the entire SpectrAlert Advance product line, these low frequency devices include a plug-in design with minimal intrusion into the back box. They utilize a universal mounting plate with an onboard shorting spring, so installers can test wiring continuity before the device is installed.

Please see below for part numbers, descriptions and pricing information:

Part Number	Description	List Price
HR-LF	Low frequency sounder, Red	$78.00
HW-LF	Low frequency sounder, White	$78.00
P2RH-LF	Low frequency sounder strobe, Red	$136.00
P2WH-LF	Low frequency sounder strobe, White	$136.00

To place an order for any of the above referenced parts please contact your NOTIFIER Customer Service Representative. Normal discounts off of list price apply.

Sincerely,

Daniel Corbett
