Product Retirement: Legacy IFP Farenhyt Series

IFP-50, IFP-100, IFP-1000, IFP-100ECS, and IFP-1000ECS impacted

Please be advised that due to component obsolesce, Honeywell Farenhyt Series is no longer accepting orders for the legacy IFP-50, IFP-100, or IFP-1000 fire alarm control panels (FACPs) and their emergency communication system (ECS) variants. In addition, replacement boards for these legacy FACPs will not be available until September 2018 with a minimum product availability of 12 months and maintain as components last.

In place of these legacy panels, we recommend ordering the new Farenhyt Series Black FACPs as indicated in the chart below. The Farenhyt Series Black meets or exceeds the performance and quality than the legacy IFP Series family, and is fully backwards compatible with all existing Farenhyt detectors, modules, A/V devices, and accessories.
