TECHNICAL TIP

PRM Module March 9, 2001

Subject: Use of the PTRM Module on the 7100 System

Remember that when planning on utilizing a printer or monitor on your 7100 system, you must use the Printer Transient Module (PTRM). This module isolates & provides the required transient protection to units mounted outside of the control cabinet. Another benefit of using this module is it eliminates the Earth Ground indication you usually receive when you plug in your laptop for programming.
