## ANX Downloader Connection Settings

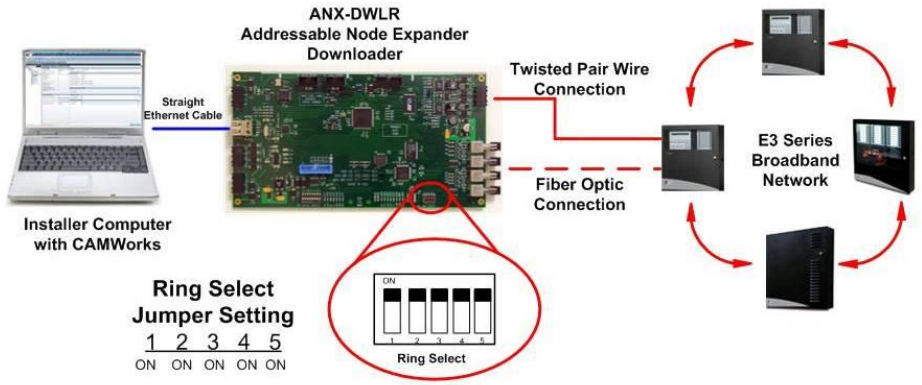

*Save time downloading through the ANX Downloader Tool!*

The ANX Downloader (**ANX-DWLR**) is an ESD only tool for your service technicians. Mounted in a small enclosure, the ANX Downloader comes with a carrying handle and screw tabs to hanging the unit on the panel or temporary on the wall.
One of its most valuable features was the ability to download system configurations into the E3 Series panels over a high-speed Ethernet port. Instead of spending minutes walking to each panel and waiting for downloads to complete, make changes and download in seconds all from one location!

Below are wiring connections and DIP switch settings for the ANX-MR-FO board when you need to connect directly to a single ring E3 Series network.

**ANX Downloader Connect to E3 Series Network through Twisted Pair Wire or Fiber Optic**

---

**ANX Downloader Connect to E3 Series Network through Local ARCNET ribbon cables**
