Technical Bulletin	TB 10022

To: System Integrators, Gent Services	Date: 28/01/2004
	Status: Active
	Type: Gent/SI

Product – Part affected:
New Vigilon EN loop cards

Details:
We have just started to issue a new style of loop card
The new loop card looks that same as the compact loop card (2/3 the length of the old loop card) with the exception of the edge connector. Compact has a 90 degree connector and Vigilon has a straight connector
The new loop card will work on all vigilon EN54 panels.
The loop chip on the new cards are the square type (32pin PLC CC), So if you are trying to do chip upgrades you will need to take note of what kind of loop cards you have.

Action:
Information only.
