Technical Bulletin	TB 10106

To: Gent by Honeywell, System Integrators & SMS	Date: 5/1/07, update 8/1/07
	Status: Active
	Type: SI / SMS

Product – Part affected:
New Commissioning tool v1.21

Details:
A new release of commissioning tool is now available V1.21 bellow is a list of changes / enhancements made.

- Support for new S4 interfaces (S4 – 344XX)
- Support for compact VA (which was removed in v1.20)
- Support for all versions of V4 software and V3.40 & above.
- Changes to the listing of major and minor conflicts to reduce possibility of corrupting devices.
- Support for SenTri devices (SMS)
- Site file directory moved to C:\program files\ Honeywell\site_files. (When trying to open old site files you will need to select the old folder location)
- Support for configurable message routing for repeat panel .
- Support for windows 95 removed

There should only be this copy of the commissioning tool installed on a PC. It should not be used in conjunction with any other versions

Action:
Please ensure all engineers upgrade to this new version of software
