Product – Part affected:
Release of new commissioning tool software (V1.23).

Details:
Version 1.23 of the commissioning tool is now available in the download area of www.gentexpert.co.uk

The release is being made to include a number of additional features which are summarised in the following list:

- Support for Windows Vista
- Support of USB drivers assigned to Com ports higher than 9 (now supports up to 99)
- Correction of Issue where groups and zones shown the wrong way around.
- Changes to managing upload of configuration files to improve resilience to memory corrupts
- Text change when adding interfaces to make it clearer if you need to select S4 interface or not.

A new version of Vigilon Control Software will be released in January 2008. This version includes the feature that manages the compatibility of commissioning tool and will work only with commissioning tool version 1.23.

In preparation for this, as of 1st January 2008 commissioning tool licences will only be issued engineers that have V1.23 installed on their PC's

Action:
Ensure all commissioning PC are updated to this latest version.
