Technical Bulletin	TB 10135

To: Gent by Honeywell & System Integrators	Date: 18/3/2009
	Status: Active
	Type: SI

Product:
New release of Nano-24 software

Details:
We have now realised a new version of Nano commissioning tool and upgraded version of motherboard (v1.39) and loop card (v1.03) software. This release is part of the ongoing development work regarding Nano.

There is no need to upgrade the loop or motherboard software.

The new version of comm. tool is required for software 1.39 MCB (new comm. tool v1.2.2)

Action:
Download the new version of the comm. tool v1.2.2 from gent expert (www.gentexpert.co.uk)

If you require to upgrade your loop and motherboard software then you will need to order the following part NS-MCB

Name: Peter Dodge
