Gent Technical Bulletin

TB: 10227

Product – Parts Affected:

VIG-LPC-EN & COMPACT-LPC-EN with older devices

Details:

The high-powered loop card VIG-LPC-EN & COMPACT-LPC-EN are designed to work with EN54 part 23 VADs and supports loop lengths up to 2km.

The loop card will support some legacy 34000 devices (not the 34450 loop powered 4 channel interface) it does not support any 3400 devices.

Please see loop card (VIG-LPC-EN & COMPACT-LPC-EN) leaflet for more details, available from www.Gentexpert.co.uk

The old loop cards VIG-LPC are still available and will support all Gent addressable device ranges (3400, 3300, 32000, 34000 & S-Quad). See VIG-LPC & COMPACT-LPC leaflet for full details, available from www.Gentexpert.co.uk

Action:

Make sure engineers and sales staff are aware of this.
